Narrative Explanation

I performed a "follow-up" inspection at this facility today.

K. Hair and K. Suggs accompanied me on this follow - up inspection today.

Item to have been corrected:

.0302 Transportation / Construction of Enclosure - I noted that the transport unit on truck #1092 has not been repaired. I noted this unit is sitting aside in the animal control yard not being used at this time. There is a broken section in the middle of the back of the box that needs welding and the door latch on the right side of the box needs replacing. K. Hair, animal control supervisor advised today that this box should be repaired by this Friday - 7/22/16. I requested Mr. Hair call me on 7/22/16 to advise if this box has been repaired.

I noted there is an old metal dog box without a fan and a hole in the metal on the left side that is on one of the animal control trucks. Mr. Hair advised that this box is not used daily, but only when an animal needs transporting to the vet. I advised Mr. Hair this box does not meet regulation and if it is used at all, it must have a fan installed and the hole in the metal repaired in a safe manner as not to cause injury to a dog. Mr. Hair stated that box would not be used any longer. It has been made known that the shelter is in violation of .0302 if that box is continued to be used no matter how infrequently.

Comments: I noted the indoor temperature was 80*F in the canine kennel portion of the shelter at 2:15pm today. I was advised by Mr. Hair that new krunda beds are on the way. I noted there were some had the legs removed but still gave a resting surface besides the concrete floor. I did not note any untreated illness or injury in any of the dogs or cats.

This facility has 14 calendar days to correct item # .0302. I will conduct a follow up inspection at some point in time after the 14 day calendar period.

☐ check here if a euthanasia inspection form is attached
