Narrative Explanation

T1. .0201 Facilities / Housing in Sound Repair - I noted in cat room 3 there has been a ceiling leak. The owner advised they were already aware there is ceiling leak to repair in room 3. Fix the leaks and repair the ceilings in these rooms 3 & 4.

2. .0204 Primary Enclosures / Surface Impervious to Moisture - I noted in room 4 the door frame molding is damaged. This needs to be replaced with plastic molding. In the future, if there are damaged moldings, they need to be replaced with plastic molding.

The owner advised at the beginning of today's inspection that after the 1st of the year the plans are to install "poly wall", a non fiberglass, plastic wall sheeting on the upper walls of rooms 2, 3 & 4. I did note small areas of damaged dry wall in the # 2, 3, 4 and 6 rooms. I also noted in #6 a piece of window molding is missing and the frp board is chewed. These areas need to be fixed as well. I discussed with the owner painting with a paint that is non porous so they may scrubb any area that they do not have covered with frp or poly wall material. All the rooms that the cats have "free range" in are considered a primary enclosure and everything inside must be able to be completely cleaned and sanitized

GS 19A 32.1 (i) Goverment ID Required - I noted there is lack of consistency in recording the ID on adoption paperwork. The owner is advised to school all those assisting with adoptions to included copies of the required ID. Comments: I reminded the owner the maximum number of cats allowed free in each room is 12. I also advised the owner that only closed or permanent groups of cats would be allowed to have a scratching post unless it is disposable.

This facility has 60 calendar days to correct the identified problems. I will return at some point after the 60 days period for a re inspection of this facility.

☐ check here if a euthanasia inspection form is attached
