Narrative Explanation

At the time of inspection facility is clean and no notable odor was detected upon entry.

Inadequacies noted include;

(0207) Walkway in outdoor enclosure area has began to chip/peel. Repaint/Reseal damaged concrete. Materials are on hand to repaint/reseal this area.

(0206) Approximately half of the population was lacking water at the time of inspection. According to Ms. Teachout these animals normally have continual access to water however she had to take an dog to the Veterinarian and placed these animals in their prospective crates when she left. Insure all animals have continual access to water. Discussed the option of using water bottles when animals are in their crates.

Population size has decreased from 22 to 17. Good work here. Records are in order and are well maintained.

Animals having chronic health conditions are continually vetted and such care is properly documented. It is evident that the animals receive a high level of care.

Isolation is intact. Ventilation is well achieved. Gravel in the outdoor play yard remains at a minimum depth of 6". No other inadequacies noted at the time of inspection. No sign of illness/injury in the general population.
