Narrative Explanation

Came out to facility today to complete an initial inspection. Spoke with with the owner, Linda Teachout, who states animals typically run freely throughout the home. Most animals were crated today. Crates are secure and in good condition. No odor was detected at facility.

Inadequacies noted include;

1) Animals are in contact with wood. (0204)

2) Animals are in contact with other materials that are not impervious to moisture (0202, 0204).

3) Most animals were lacking continuous access to water. Community water bowls were available for free roaming animals. (0206).

4) Records of medication administered were lacking on most animals needing medication. (0101)

Discussed many different options for this facility. If animals were going to continue to roam freely throughout the home all surfaces in the home would have to be made to be impervious to moisture. Ms. Teachout stated a room in the basement could be utilized to house the animals along with a building being repaired in the backyard. Further discussion led to an agreement to bring the room in the basement and the building into compliance with the Animal Welfare Act/Admin. Code. We agreed on a timeline of 90 days to bring the basement room into compliance. The following items will need to be addressed within 90 days.

1) Floors/Walls are currently not sealed. Reseal walls/floors (0202, 0204).

2) Wooden framing exists on the walls and around the door. Cover these surfaces with a material impervious to moisture such as FRP (0202, 0204).

3) Ventilation in this room is not adequate. Suggested a window unit to increase ventilation and maintain ambient temperature. (0202)

At the end of the 90 day period I will return to follow up on the inadequacies mentioned above. At that point we

Narrative Explanation

will discuss the next step(s) in bringing the outdoor play yard area and building into compliance. For the time being the front grass play yard will be utilized for animals to exercise.

Many animals noted today are senior animals which require continual medical care. Records indicate that such care has and is being provided. Overall the animals were adequately cared for and much attention has been paid to grooming, dental care, and rabies vaccinations.

Will follow up with this facility in 90 days.

☐ check here if a euthanasia inspection form is attached
