Narrative Explanation

Annual inspection performed today, I arrived on site at 11am, and office assistant, Pete accompanied me today. Housing areas are clean or in the process or cleaning during this inspection, I viewed no obvious signs of untreated illness or injury noted. Ambient temperature is within range in all indoor areas, and records are on site and to AWA Regulations.

Previous inspection was performed on 4-27-16, that inspection noted uncovered wood within the cats access in enclosures and indoor housing areas (0202/0204); also noted to add gravel (0203) and continue to wrap trees with metal sheeting.

Today's inspection:

* (0204) Primary enclosures impervious to moisture- is not acceptable because of exposed, uncovered wooden beams seen in both of the front housing area cat rooms. Owner has covered the exposed wood on the bottom and walls, however all wood within the cats enclosure and their reach needs to be covered with a product impervious to moisture.
* (0203)- Continue to add "chapel hill" gravel as necessary to ground cover in the outdoor areas to maintain appropriate husbandry, continue to wrap trees with metal sheeting.
* Wooden clip boards on wire crates are beginning to break and/or become damaged, replace damaged clip boards with plastic ones as they become damaged.
* Several cat houses are under quarantine today due to ringworm and/or URI. Cats are being treated and seen by the facilities veterinarian, Dr. Bonnie, and records for that treatment is appropriate.

Narrative Explanation

** This is a large sanctuary/rescue, with the cats having safe access to a large outdoor roaming area. They are provided with housing, bedding, and access to indoor areas. The facility and premises are clean & well maintained, the cats housed here appear very well cared for, happy, and quite peaceful. Inadequate areas noted today are minor, and the staff, volunteers, & owner are always striving to make improvements.
