Narrative Explanation

Annual inspection performed today, facility is clean and odor free at time of inspection with no apparent signs of untreated illness or injury, and ambient temperature is within range in all housing areas.

0202} Drainage indoors deemed not acceptable due to draining issues in large isolation room. The drain does not coincide with the slope in the floor and therefore causes water to pool behind the primary enclosures in that room. Today knats are noticeable in the room, more than likely due to the excessive moisture.
Address the drain issue by adding another drain where the slope in the floor is.

* Resting surfaces have been replaced and all wooden clip boards removed since previous inspection, no other inadequacies noted.
