Narrative Explanation

At the time of inspection cleaning is in progress and no odor detected from the enclosure area. Food is appropriately stored. Records are in order. Ventilation units were clean and functional. Renovations to this shelter are underway. Masonry walls have been implemented between enclosures on the outside portion of this facility. The new concrete has not yet been sealed because the facility is waiting to seal the entire facility at one time. Seal concrete walls/floors (0202, 0204). The drain on the outside portions of this facility will be included in this sealing process. Bidding closed on the interior portion of this facility on 8/15/13 at COB. Enclosures have been replaced in the interior portion of this facility to help this facility remain functional during this renovation period and is acceptable. Interior portion of this facility also needs resealing for walls/floors (0202, 0204). Some enclosures on the interior portion of the facility remain damage and rusted however this does not pose an immediate health risk to the animals and is acceptable during this renovation period. (0207). 2 trucks were available at the time of inspection. These trucks have dog boxes on the back but lacking forced air units and the ability to maintain ambient temperature. I am requesting that county management develop a time line for upgrading the dog transport boxes to meet the animal welfare standard (02 NCAC 52J 0302).

No other inadequacies were noted at the time of inspection. The approval for today's inspection is contingent that renovations/improvements continue to progress at this facility. Will follow up with this facility in 30 days to review improvements on the inadequacies noted.

I reviewed GS 19A 32.1 with Lt. Dewitt at the time of inspection.
