Duplin County Animal Shelter	Duplin County Goverment	Kenansville	NC

Narrative Explanation

I performed an "Annual" inspection at this facility today.

I noted the following items need to be corrected:

.0202 Indoor Facilities / Ventilation & .0204 Primary Enclosures / Cross Contamination & .0207 Sanitation / Isolation - I have grouped these 3 areas together because they are all in regard to an ongoing health problem in the cat room at this shelter. I found in my review of the records that there has been an Upper Respiratory Infection problem going on for 30 days. There have been 44 cats euthanized due to this problem from 7/8/15 - 8/10/15. The shelter is following their veterinarian's recommendation in that they change the disinfectant to "quat" and they try to isolate the sick from the well cats as much as possible. This shelter is very small and has only one cat room where they house feral, sick and adoptable cats in. In leu of this ongoing problem, the shelter is required to create an isolation area for cats with separate ventilation. All surfaces: cages, walls and floors must be materials that can be cleaned and sanitized. There must also be means to heat and cool this room. The existing cat cages must be replaced because there are cracks and openings that cannot be thoroughly cleaned. It was apparent today that cross contamination is a problem. These cages must be replaced with a cage that does not allow cross contamination either by nose to nose or body fluids.

General Statute 19-A 32.1 (i) Goverment ID required / The shelter must obtain a copy of a goverment ID for each animal that is adopted. This includes all rescues.

The shelter director advised that hand sanitizing stations have been added to each area in the shelter to aide in preventing disease.

I will conduct a follow up inspection in 30 calendar days (9/11/15).

☐ check here if a euthanasia inspection form is attached
