Narrative Explanation, continued

1) One dog "Wolfgang" was noted to be on two different types of medication. The medication log for this animal did not note the type of medication given. It only indicated "blue pill" and "white pill". The animals is currently being boarding at the time of inspection. Staff available went to the animal's enclosure and obtained a pill box an indicated that "the owners had not told them what type of medication the blue pill and white pill are". 52 J 0102 states (3) veterinary care provided while boarded, which shall include date, times, description of medication (including name and dosage) and initials of person administering product or procedure.". Maintain all records to be in full compliance with the Animal Welfare Act at the time of inspection. Owner, Chris Dunn, called the owner who was also unsure of what the medication is. Mr. Dunn then called the Veterinary Hospital on record for this animal and was able to then determine what medications "Wolfgang" had been taking during his stay at this facility.

No other inadequacies were noted at the time of inspection. It appears that the type of sealant used to seal cracks at this facility is maintaining better than previously used product. This was improved from the previous inspection. Temperature is ambient and thermometers are in place. I did not note any signs/symptoms of illness or injury at the time of inspection.

This report was signed by Owner, Chris Dunn.
