Narrative Explanation

At the time of inspection the following inadequacies were noted;

1) Introductory room is being utilized to house 6 cats. This area is not an approved area for housing cats. Several surfaces are not impervious to moisture in this room, wooden desk is located in this room, enclosures are lacking cross contamination panels in this room, thermometer lacking in this room. (0202, 0204, 0201). This room may not be utilized for housing cats until it is brought into compliance with the AWA. Please contact me prior to using this room for housing animals in order for an inspection to occur prior to use.

2) 4 cross contamination panels are lacking in the main cat room. Implement and maintain cross contamination panels between all enclosures. (0204).

3) Thermometer lacking in the main cat room. Install thermometer in all areas of enclosures (0201).

4) 1 open bag of food noted at entry to play yard. Maintain all food in sealed containers (0201).

5) Fabric chair remains in main cat room. This was noted on the last inspection on 4/9/13. Remove/Replace fabric chair which is not impervious to moisture (0202).

6) Play yard located off of the leonard building appears to have been utilized since the most recent inspection. A dog house and toys were noted in the play yard. Owners/Managers had agreed to contact me prior to using this play yard so that an inspection could occur to insure this area had been made to be in compliance with the AWA. A wooden deck and wooden fence are located in this play yard. This yard should not be used until it can be brought into compliance with 52J 0202, 0204.

Since the previous inspection the fabric cat climbing tree has been replaced with a cat climbing tree that is impervious to moisture. The FRP in the main cat room remains in good condition. No odor was detected at this facility. No sign of illness/injury was noted in the general population.
