Narrative Explanation

Door to intake in adoption building must remain closed to prevent adoptable feline from getting contaminated by incoming animals as noted during last inspection place an automatic closure on this door. Kennel floors need to be sealed as noted during last inspection floors are damp during this inspection, it is recommended that an epoxy type material be used to prevent moisture and seal concrete in Kennels. Floor in new cat building needs to be sealed and painted prior to being used. This facility does not have an adequate machine to wash bedding and other materials at present a residential washer is being used an industrial washer is needed in this type of facility. Cover lights over kennels to prevent glass fro falling in kennels. Remove soda machine away from animal area and replace sink. Remove bedding and other clean materials from garage to prevent contamination from incoming animals and exhaust from vehicles. Remove sharp edges on bottom of fencing in multiple kennels. Remove rust from fencing in multiple kennels. Replace rusting door in intake area.

All animals appear healthy facility is clean. I will follow up in approximately 90 days.
