Narrative Explanation

Performed a random inspection.

The facility was clean, there was no odor, and no sign of illness in the general population.

Cracks have continued to be sealed. High contact areas have been repainted. New outside shade structures have been constructed and are adequate.

Inadequacies noted are:

0204- Surfaces impervious to moisture- Inside of the kitten room there is chipping paint on the cinder block wall. These areas should be repaired to be impervious to moisture.

0204- Surfaces impervious to moisture- There is chipping paint present in the inside and the outside dog enclosures. Also there are areas where the floor is unsealed or coating is cracking. These areas should be repaired to be impervious to moisture.

0204- Enclosures in sound repair- Inside of the puppy room there is a metal kick plate on the door that has been damaged due to chewing. This area needs to be repaired to have the enclosure in sound repair and prevent injury to animals in this room. (Has been repaired since last inspection but has become damaged again.)

The facility is in the process of accepting bids to have the floors resealed.

Medical logs checked were adequate and in order.

Keep up the great animal husbandry and addressing the animal's needs.
