Narrative Explanation, if needed

Improvements from previous inspection on 3/8/12 include: 1) All animals with the exception of 2 were found to have water and watering receptacles. 1 of these animals was given water at the time of inspection. 2) The majority of cracks and peeling floors have been sealed with the exception of the area directly behind the adoptable cats. 3) the majority of the debris throughout the facility has been removed. 4) the vast majority of the animals currently being housed at the facility had adequate square footage in their primary enclosure 5) cross contamination panels in the canine enclosure areas have been installed 6) electrical covers are in place 7) kennels have been rearranged and crates have been removed in isolation building to help in the prevention of cross contamination. 8) Medication logs have been implemented however these logs lack notation of time of administration.

McDowell County Animal Outrea	Marsha Carroll - Director	Marion	NC

Narrative Explanation, continued

Inadequacies noted at today's inspection include: 1) Animals continue to be housed in the area directly behind the adoptable cats. The floors are not sealed and/or impervious to moisture. Ventilation is not sufficient in this area. 1 ventilation unit has been installed but more units are required due the square footage of the room. Crates housing cats are stacked on top of each other and are not secured to one another nor are they in a position to prevent cross contamination. Crates are stacked on objects such as; tires, pressboard tables, wooden tables, card tables, storage tubs, and other various surfaces. These surfaces pose a hazard due to stability and several of these surfaces are not impervious to moisture. 2) Thermometers are not present in the areas animals are being housed 3) After a considerable amount of time records were found to be lacking proper origination information, proper description of animals, proper location in facility, proper disposition information, and proper vaccination status. 7 animals were lacking proof of rabies vaccination. [NCAC 52J .0101, NCAC 52J .0210]. 4) Several cats being housed in area directly behind the adoptable cat area which were reportedly adoptable animals were exhibiting signs/ symptoms consistent with upper respiratory infections. The symptoms include runny eyes, sneezing, and/or matted eyes. 5) Hair continues to build up around the drain and grates in the canine adoptable area. These drains should be rinsed daily as was discussed at the time of inspection. 6) Program of veterinary care that was established at the time of issuance of license was not in affect at the time of inspection. 7) Vehicle utilized for transportation was not available at the time of inspection (0301,0302,0303).
