McDowell County Animal Contrc	McDowell County	Marion	NC

Narrative Explanation

At the time of inspection inadequacies noted include;

1) Floors/Walls throughout facility continue to chip/peel. Plans are in place to sand blast the walls/floors and to reseal with clear sealant throughout the facility. Repaint/Reseal. (0202, 0204)

2) Drainage throughout facility remains an issue. Left side of building has sufficient standing water. The loading dock has been removed but the ground is not level and water continues to stand in these areas. Grass has not yet been sown resulting in a sufficient amount of run off. Repair drainage issues throughout facility. (0201)

Drains inside facility continue to backup. This issue remains from previous inspections. (0203)

3) Concrete and block in outside enclosures continues to crack. Sealant in this area is also peeling off. Repair/ reseal concrete. (0203).

4) Procedure set up for cleaning is adequate however this can not be completed because of issues with floors and concrete. Repair floor/concrete issues throughout facility in order to insure that cleaning can be completed as set forth in the policy/procedure manual. (0207)

5) One truck was available at the time of inspection. This vehicle is not equipped with a mechanism to maintain ambient temperature. Fresh air/ventilation is achieved by the breeze created when the vehicle is in motion. Important to note that vehicle at facility today is not used by city or county animal control employees that transport animals.

Improvements from previous inspection includes;

1) Roof has been repaired

2) Pest control has been implemented using "Go Forth Pest Control" on a monthly basis.

I am requesting a written timeline from county management for when all inadequacies noted on this report and all previous inspection reports can be complete. This timeline is requested within 15 days.
