Narrative Explanation

Random inspection performed today, facility is clean, organized and odor free. I viewed no apparent signs of illness or injury today, ambient temperature is within range, and all records are on site and to AWA Regulation.

Previous inspection performed on 10-5-5 noted the following inadequacies:

*Chipped epoxy in enclosures and general housing area (0202).

* No photo for animals off-site (19A-32.1d)

Todays inspection:

0202- Indoor housing area is not acceptable for surfaces impervious to moisture due to chipped epoxy on walls and walkways, epoxy chipping is minor at this time, and the shelter has recently obtained a quote for the work to be done. (noted on the 4-14-15 & 10-5-15 inspection.)

0204- Enclosures are not acceptable for surfaces impervious to moisture due to chipped epoxy on cinder block walls and floors, epoxy chipping is minor, and the shelter has recently obtained a quote for the work to be done. (noted on the 4-14-15 & 10-5-15 inspection.)

19A-32.1d - Photo of animals off site is not acceptable at this time, the shelter does have 4 cats at the local Petsmart at this time for adoption, but a photo of those cats are not kept in a public location. The shelter did have a binder with animal photos and a brief bio, but the binder kept going missing - per shelter staff. We discussed acceptable option to better display the animals photos as required by this rule, to include: a digital frame, a cork board, or other means to display the photos.

*Also noted today to add pinestraw to the outdoor cat enclosure, as well as to pick up storm damage in play yards. Staff advises me they have contacted their landscaper to do this work.

Facility has recently paved their parking lot, added a new partial metal roof, and done various upgrades in the building. The work looks great, the animals housed here appear healthy, happy and well cared for!
