Narrative Explanation, continued

Random inspection performed today.

Since the last inspection on 10/13/14 there has been a new small dog crate area created in the orange room.

Items to correct:

1. .0203 Outdoor / Surface Impervious to Moisture - The wood frames that the heat / air units are stationed upon need to be isolated from the dogs. The dogs are chewing on the wood. Suggested using chain link fence panels to keep the dogs off these frames.

2. .0203 Outdoor / Sound Repair - In the yellow, orange and green play yards there are 3 plastic sets of play equipment that have chewed areas. The one in the yellow yard needs to be discarded, the other 2 may be have the chewed areas sanded and made smooth and extend the life. Do not use any longer if the equipment has open holes that are not safe and cleaning cannot be made complete.

3. .0204 Primary Enclosures / Sound Repair - Green Room - Secure the cross contamination barriers so they are secure at the top and bottom.

4. .0207 Sanitation / Enclosure Sanitized 2 x a day - Orange room - there is hair buildup on the metal kennels. These kennels and all kennels in the facility are required to be cleaned a minimum of 2 times a day.

5. .0204 Primary Enclosures / Impervious to Moisture - At present the manager of the facility is disassembling the free standing kennels in the green room to pressure wash and repaint. All the free standing kennels need this done. The owner was not on site today but on the last inspection she discussed investing in another style kennel with solid walls that would be sturdier and easier to clean. Continue pressure washing and repainting these kennels until all are clean and repainted.

Follow up inspection in 30 calendar days on all items except # 5 (3/6/15).

Follow up inspection in 60 calendar days on item # 5 (4/6/15).
