Narrative Explanation, continued

I performed a follow up inspection from 2/11/15.

I observed the following items have been corrected:

.0203 Outdoor Facilities / Surface Impervious to Moisture / .0204 Primary Enclosures / Prevent Contact with Wood - I noted today that all the wood flooring between the office / grooming building and the boarding building has been replaced with the non wood trex flooring and it is installed with stainless steel screws. The work looks very nice and is acceptable. I also noted the new door thresh hold has been sealed. The owner has moved the fencing closer to the play yards which will help protect the doors entering the grooming and boarding buildings.

Comments:

I have noted the reason this follow up inspection was not conducted within the original time frame was due to the inclement weather preventing the replacement of the outdoor wood flooring. The owner called me twice to advise me that due to the weather she was not able to complete the work in the designated time frame. I advised the owner that I was aware of the weather and would work with her and extend the due time.

I noted that the owner has completed the ceiling repair work in the boarding building and new lighting has been installed. All of this work looks very good.

Today the owner showed me a new addition to her facility. She has created a separate area for a public dog bathing room. It is constructed out of plastic and all acceptable materials. No problems were noted with this new addition.

I noted the facility and yards were clean and odor free.

Continue to make repairs when needed.
