Narrative Explanation, if needed

Follow-up inspection from 9/24/12. Items Corrected: None. Damaged krunda beds have not been replaced, #46 kennel has not been repaired, loose dry food is still scattered on the food / laundry room floor.

Items to be corrected:

.0204 Primary Enclosures / Sound Repair - #46 kennel - repair the front panel that is patched with a concrete block. Without the block, this kennel is not escape proof. Do not use this kennel until repaired.

.0204 Primary Enclosures / Sound Repair - All kennels that have damaged / scratched areas where the paint is

Narrative Explanation, continued

peeling and the rust is showing - clean the rust down to smooth, clean metal and repaint all areas on these kennels. These areas must be clean and smooth in order to properly clean and sanitize them as needed.

.0204 Primary Enclosures / Resting Surfaces - there were no resting surfaces available for any of the dogs housed in the kennels today. A resting surface must be provided for each dog.

.0201 Facilities / Food Protected - food/laundry room - dry dog food was found scattered on the floor of this room as in the past inspection. This room is very untidy. Clean and organize the food / laundry room.

.0206 Watering / bowl in good repair - chewed plastic water buckets were noted today in the exercise areas. Replace all chewed water buckets. Any chewed food or water receptacles needs to be replaced as it makes cleaning them difficult and can be dangerous for the dog. Use only receptacles that are made for animal use.

.0202 Indoor Facilities / Ventilation - Upon entering the kennel area today, strong urine odors were noted. Discussed this with the manager and advised more attention is needed to cleaning and changing of mop water.

Comments: Upon entering the day care area, it was noted the ratio was out of balance - 1 person per 10 dogs at ALL times. This was corrected during the inspection. Advised manager to inform all workers what the correct ratio is and to abide by it at all times. To put excess number of dogs in the kennels if no one is available to supervise them.

Temperature was 77* in the kennel area at 11:30 am today.

Records were examined and all items were found in compliance.

Advised manager to identify (number) all the kennels in order to more easily identify any kennel that may need attention. Recommend examining each kennel every week in order to identify any problems before they get out of hand.

Advised manager to store the plastic pool properly (empty of green water, clean and put away for the winter). This was on the outside of the exercise yard. Follow-up inspection in 30 calendar days.
