Narrative Explanation, continued

I performed a "follow-up" inspection at this facility.

I noted the following items have been corrected:

1. 0204 Primary Enclosures / Sound Repair - I noted the #116 town house has had the damaged aluminum stripping on the right side replaced and the missing molding replaced. The work is acceptable.

2. .0102 Records / Signature - I noted improvement in the sign in log. Continue to work with the customers so they understand to use this log each time they come for day care.

3. .0201 Facilities / Perimeter Fence - I noted several areas in the perimeter fence where the concrete that encased the chain link had become soft, crumbled and left a gap under the chain link. I noted today that most of the areas were in good repair - solid with no gaps. I did note on the east side of the fence a soft area and along the west side in the low area of the yard there are still soft areas of concrete that will crumble.

Item to correct:

1. .0201 Facilities / Perimeter Fence - I noted from what I saw on the grass exercise yard that the owner still needs to work on an area on the east side and the west side where the concrete is soft. I discussed with the manager that the owner should consider correcting the water drainage problem on the west end or installing fencing to prevent the dogs from having access to the wet area or moving the existing fence to the higher ground. As long as this area remains wet, grass will not be able to be maintained so that should be taken into consideration as well.

Comments:

I noted the exercise yards were clean of old feces. I noted the new small dog room kennels are not ready for use yet. Remember to cover all the wood that a dog will be exposed to before using these kennels.

This facility has 30 days to correct .0201. I will return at some point after the 30 day period for re inspection.
