Narrative Explanation, if needed

Annual inspection performed today.

Item to correct:

.0201 Facilities / Housing in Sound Repair - Outside back door of isolation / storage room - the bottom of this steel door has rusted at the bottom to the extent that you can see daylight. It is not rusted to the point of replacing the entire door but the bottom on the inside and outside needs a metal plate installed that covers the width of the door and is at least 12 inches high. This would cover all the rusted out areas.

Narrative Explanation, continued

Comments:

None of the puppies or kittens were old enough at this time to have received Rabies vaccinations. Store manager is aware of the dates they are due.

There were no visible signs of untreated illness or injury noted. Resting boards were available for all puppies and kittens. Records were adequate.

Remember to keep all plastic accessories replaced when they become chewed (food bowls, plastic pans used as resting surfaces, etc).

Follow-up inspection in 30 calendar days - 8/30/13.
