Narrative Explanation

Annual inspection performed today.

Since the last inspection the shelter has made improvements in several areas: the new section of the shelter has been painted, a "No Public Access" section has been created in the new section kennels to house special "hold" dogs, a new 4 post shelter has been built in the grass exercise yard that will give shade and weather protection and a set of cage frames has been constructed to station the cat cages in to give a more secure / steady place to set the cat cages - all very nice.

Items to correct:

1. .0202 Indoor Facilities / Lighting - Freezer room - no light was present today. Check fixture and make sure it is working - may just need a new light bulb.
2. .0203 Outdoor Facilities / Surface Impervious to Moisture - Cover the 4 wood posts on the new shelter in plastic. French drain pipe was discussed at 4 feet high. Metal may be used of so desired as long as it is secured in a safe manner.
3. .0204 Primary Enclosures / Surface Impervious to Moisture - New k-9 section (I) seal the crack in the concrete floor.
4. .0204 Primary Enclosures / Surface Impervious to Moisture - Old k-9 section - Rust is once again coming through from the metal strip that runs directly in front of each kennel. These were painted last year and it was discussed whether removing the metal would be the best to prevent the rust from coming back.

Either replace the metal strip and repaint or clean the specific areas and repaint again.

Comments: Shelter was clean and odor free. Temperatures were in range in all areas. Advise using gravel yard over grass until spring when grass starts growing again. Records meet the AW requirements.

Follow up inspection in 45 calendar days - 3/9/25
