Narrative Explanation, if needed

On Tuesday, September 23, 2014 I stopped by to do a follow up inspection at this facility. Upon arrival Mitchell met me at the door stating that he had a training appointment that he had to leave for. I asked to step inside to do a quick check and that I would not do an inspection form at that time. As soon as I walked in I noticed a pile of trash, hair and debris swept into one corner. He stated that he had swept that up that morning and that it would be cleaned up when he returned. There was no water in the kennel with one dog. I asked that water be put into the crate before I left. This was done and we left the facility. I returned today, September 29, 2014 to do a follow

Narrative Explanation, continued

up. Walking into the office I viewed trash scattered all over the desk and in the floor. There was black hair covering the walls and tub to the point that it was almost a solid sheet of hair. (0201) There was no trash receptacle or trash bag in sight. Through the office door there was an open bag of old dog food that Mitchell stated needed to be thrown out. (0102) No sign in/sign out sheet is available for the boarding or daycare dogs. (0103) & (0210) There were four dogs at the facility, two of which are Mitchell's, one for boarding and one for daycare. Rabies vaccincation was missing for Jeb, a pointer. No records at all available for Grady, Labrador. Upon entering the kennel area I noticed a strong urine smell. The same pile of debris from last Tuesday was in the corner with the broom still over it. Mitchell stated he had not had time to clean the floors since I was there last. (0202) I found that paint is chipping throughout on the concrete floors. Mitchell stated he has tile ordered and will be in within a week. (0203) Trash (paper cups) were piled at back door to the outside play yard inside the fenced area. (0204) Wire crates are used for kenneling the dogs. These crates are still in need of being repainted as they are rusting. This has been discussed at previous inspections as well. Some of the crates do not have bottoms at all (no trays or wire) allowing the dog to push the crate around the room. (0206) Again there was no water available for the dogs. (0207) The floors have not been cleaned since Tuesday therefore there was feces throughout that had not picked up and that was stuck to the floor. Standing urine was visible throughout the play room. The futon bed had two pieces of damaged FRP laid across it. I told Mitchell this needed to be removed to prevent injury. The futon bed itself was covered in urine stains and the frame is rusting. This has to be removed from the facility if not being maintained properly as we discussed in previous inspections. The FRP walls need to be cleaned with a degreaser and sanitized. Floors and walls should be cleaned on a daily basis no exceptions.

Overall husbandry and maintenance are lacking throughout. I will return in 7-10 days to follow up on records and the cleanliness of the facility and the office.
