Narrative Explanation, if needed

Follow up inspection from October 29, 2015. The following inadequacies are still in need of being addressed:

1) (0102, 0103 and 0209) Proper record keeping is still lacking. I asked for the paperwork for the last dogs that recently boarded. Owner stated it had been over a week. The only paperwork available for the 3 dogs were the vet records. There was no signed contract, no permission to commingle, no signature showing whom the dogs were released to. Owner stated that she did not have them fill out the paperwork. Records must be kept for 1 yr on each animal.

Narrative Explanation, continued

02 NCAC 52J .0102 RECORDS; BOARDING KENNELS reads as follows:

Operators of boarding kennels shall maintain records of all dogs and cats showing the following:

(1) name and address of owner or person responsible for animal, the date of entry and signature and address of individual to whom animal is released and the date of release;

(2) description of animal including breed, sex, age and color marking; and

(3) veterinary care provided while boarded, which shall include date, times, description of medication (including name and dosage) and initials of person administering product or procedure.

2) (0203) Bare dirt is still present in the play yard. Grass has been resewn but has not came through in many areas. Temporary fencing has been put up but the dogs have dug under and/or torn the temporary fence. This fencing must be secured so that dogs cannot get into this area unless they are leashed walked until the grass comes in. We discussed the possibility of pouring a concrete pad and artificial pad.

3) (0207) Sanitation is still lacking throughout the facility. Cobwebs are present throughout the facility. Dust and debris are coating the fencing on the inside kennels and the walls of the facility. Cleaning began while I was typing this inspection.

4) Beds that are in two of the kennels have ripped fabric and large holes. Owner states these are pulled out when boarding dogs come in. These beds cannot be used for boarders until they are repaired.

5) (0204) Cross contamination barriers are still in need of repair. One has been repaired since last inspection.

I will follow up after 15 days to ensure that records are being kept properly, that husbandry has improved and that temporary fencing in secure until grass is established or gravel/concrete has filled in the bare dirt spots. If at the time of next inspection the above items are not in compliance a disapproved inspection may be given.
