Narrative Explanation, if needed

BobHumane euthanasia by injection was performed on 2 dogs during my inspection. Euthanasia was performed humanely and compassionately by two staff members. There were no complications during either euthanasia performed. Death was determined by lack of ocular reflex and lack of heartbeat. Dogs were disposed of properly. Euthanasia was documented properly. Policy and procedure manual was intact. List of current CET's was updated at the time of inspection. I asked that all information pertaining to CO be pulled from the manual as this practice is no longer used.
