The Kennels At Wennie Hill	Tammy Owens
Name of business	Name of owner

241 J.A Hampton Road	Rutherfordton	NC	28139
Street address	City		ZIP code

Narrative Explanation, continued

02 NCAC 52J .0204 PRIMARY ENCLOSURES

(a) Primary enclosures shall be constructed so as to prevent contamination from waste and wastewater from animals in other enclosures:

Feline litter pans appear to not have been emptied or cleaned in several days, the odor in this area is stronger than the rest of the facility: Empty and clean cat litter pans a minimum of two times per day. Remove eggs that are being stored in the room that houses cats. Clean all outside kennels these also have not been cleaned in several days. Remove weeds and vines from all outside kennels. Remove all clutter such as towels, sheets and cardboard from center of kennel and cat area to prevent contamination and improve odor. 0204 Solid resting surface : Place barriers between wire kennels to prevent cross-contamination.

0103 Records made available : Mrs. Owens states she cannot provide records for any of the animals at this facility, I advised her records for all animals at this facility must be made available within 10 days including: Owner information with signatures, all immunizations, , medication logs and date and times animals entered facility and left facility.

I was shown a locked room in this facility I had not seen before. This room has approximately 30 puppies Mrs. Owens states these are her puppies for sale, conditions in this room are as bad as in the main kennel cages have old food and feces inside, this area also has not been cleaned in days. Owner must add an impervious material in kennels with wire bottoms that puppies are in. Owner cannot provide any paperwork for these puppies as well.

I have taken pictures of all inadequacies indicated, above.

Facility is to submit a corrective plan of action to the Animal Welfare Section within 10 business days.

This facility has 10 days to correct these problem. I will return at some point after the 10 day period for re-inspection if this facility.
