Item Number	Explanation of Inadequacy (circled items above) And Recommendation For Compliance	Date Corrections Must Be Completed
	Follow from 1-17-08	
	Since 1-17-08 the food/water pans are now being cleaned/sanitized in the cat room sink w/hot water. Lighting is now okay in cat room.	
	Still to be addressed:	
	6) 7) Cross contamination barriers - a test area was set up by county maintainence but a seal was not established - met today w/Lee Cannedy from maintainence - and Susan Holder - director - it was decided a row of 8" block - sealed - will be laid to act as a cross contamination barrier -	
	6) 11) 12) 13) The odors are more noticeable today near the back of the building - quarantine room had not been cleaned - staff started at 8:30 Am and the inspection was ongoing at 10:15 Am. Qt. room still appears to need a more detailed cleaning. (14) There are ongoing problems w/waste disposale - for now, pumping is being done about every 3 weeks. Due to original construction this will be a regular process.	
	26) Still need to include address on intake forms.	
	25) Vet treatment - no log has been started for any necessary meds that would be administered while animal is housed at shelter. A log will be started.	
	31) Run #62 - Qt. dog had bloody diarrhea - a sample was taken to vet for diagnosis.	
	Still need Thermometers in Kennel area at "dog level".	
	Temp. Today was 68.7° - good for 6'. Maintainence can move heat sensors to a better area for dog's benifit.	
	Discussed euth. gas chamber - need either a divider or cages that will fit in chamber - do not put dogs together in chamber or mix puppies w/adults	
	Maintainence plans to start on cribs as soon as possible and will call me to stop by when work begins.
