Narrative Explanation

Follow up inspection done today. LT. O'Neal in attendance. The infractions from previous disapproved inspection remain with the exception of some caulking of the walls and fitted metal sleeves to the bottom of kennel posts. The caulking has not been sealed. The metal sleeves require a sealant around the lip. There are as well new areas of concern. Noted a few of the ceiling tiles have recently acquired water stains of unknown origin. Possible leak in roof. Due to noted mold growing on walls and around ceiling vents, LT. O'Neal conducted a mold test kit and sent it off to a professional lab for results. These results show 4 types of molds throughout the facility. Strongly suggest that they have a professional come in to evaluate this issue, give recommendations to rectify the problem and provide them with a quality air test. The lack of corrections and the new concerns have made my decision to disapprove the shelter once again. All animals on the premises at this time appear happy, healthy and free of injury. I will return again in 30 days to check on progress.
