Narrative Explanation

Courtesy inspection performed to inspect addition to the facility. Addition is set up to house quarantine/isolation animals. The area consists of Shore-line stainless kennels that equal to 15 enclosures. Trane heating and air conditioning unit has been installed. Thermometer is present and room was in ambient temperature at 70 degrees. Animals will be brought in through a separate door to this area eliminating exposing the sick/diseased animals to the general population. A center drain has been installed in the floor. Cement block walls have been painted and sealed. Floors in the room have been sealed with an epoxy paint.

During the visit Jason took me out to the outside play yard. White rock has been added around the high traffic areas at the fence to help eliminate the bare dirt areas. Grass is well established in this area.

There are 3 small outside kennels that Jason would like to begin using for puppies and small dogs for play time. In order to begin using this area the concrete floors and cement block walls have to be sealed. Guillotine doors must be added to which I suggested metal framing as used in the inside kennels. A roof/cover must be added for sun and inclement weather protection.

New addition looks great and is approved for use and the additional enclosures will be added to make the total number of 69 enclosures.
