Oak Hill Kennel	John & Amy Dahl	West End	NC

Narrative Explanation

I performed a follow up inspection today to the facilities 5-14-15 disapproved inspection. At that inspection the following inadequacies were noted:

1.) 0202- Poor ventilation in the front enclosures, with a stagnant, pungent odor noted. (5-14-15)

2.) 0203 - Drainage for outdoor enclosures was blocked by hair and debris (5-14-15)

3.) 0204 - Insufficient cross contamination barriers for outdoor enclosures. (Advised to equip with a solid barrier 4-6 inches high, or remove all animals in this area prior to hosing and cleaning enclosures.) (5-14-15)

4.) 0204- Damaged/scratched wood seen within primary enclosures. (5-14-15, 11-10-14, 3-15-14, 11-25-13,

5.) 0204 - Chipped epoxy noted within primary enclosures in the front building.(5-14-15, 5-15-14, 11-25-13,5-9-13)

6.) 0207 - Animals not removed while cleaning with a hose down method (5-14-15)

Follow up inspection results:

1.) 0202- Ventilation is improved today, air is cool, circulating, and I smelled no odor.

2.) 0203- Drainage for outdoors is improved, however the drain on the left side (facing the front of the business), is seen full of hair - clean and hose the strainers for drains daily.

3.) 0204 - no cross contamination barriers have been added, and owner is not present for us to discuss their protocal for cleaning these enclosures.

4.) 0204 - All exposed wood has been covered with a product impervious to moisture.

5.) 0204- Chipped epoxy on the floors on the primary enclosures have been remedied and the floors are completely sealed. I did view some minor chipping of the walls.

6.) 0207- Cleaning was completed at the time of my visit, I seen no staff spraying enclosures while animals were present, and no evidence of dogs being sprayed.

Inspection Results	Date of inspection
Disapproved	Jun 16, 2015

Oak Hill Kennel	John & Amy Dahl	West End	NC

Narrative Explanation

Facility is clean and odor free with no apparent signs of illness or injury. Ambient temperature is within range in all housing areas.

Owner is not present at this inspection, however her 14 year old son is the only person present on the premises. Due to his age and lack of any present guardianship, this report is not signed by any Owner, Management or representative of the kennel. I did however, have the son sign my notes, acknowledging my presence on the property.

Follow up inspection is disapproved due to the blocked drain on the left side, and the lack of cross contamination barriers or any protocol for cleaning that area.

☐ check here if a euthanasia inspection form is attached
