International Marketing Plan Workbook

The purpose of the International Marketing Plan workbook is to prepare your business to enter the international marketplace. Ask yourself: Should I expand my company through exporting? Do I have any products or services I can export? This workbook will lead you step-by-step through the process of exporting your product to an international market.

The workbook is divided into sections. Each section should be completed before you start the next. After you have completed the entire workbook, you will be ready to develop an international marketing plan to export your product. The remaining chapters of this Guide will assist you in determining where and how to find the resources to begin exporting successfully.

* When products are mentioned, services should be assumed also.
Planning

Why complete this workbook and write a plan?

Six reasons it will be worth your time and effort:

1. Careful completion of this workbook will help evaluate your level of commitment to exporting.
2. The completed workbook can help you assess your products’ potential for the global market.
3. The workbook gives you a tool to help you better manage your international business operations successfully.
4. The completed workbook will help you communicate your business ideas to persons outside your company. It is excellent starting point for developing an international financing proposal.
5. Businesses are managed more successfully when operating from a business plan.
6. A plan forces the business to stay focused on primary objectives and provides a measuring too of results as each step is achieved.

Can’t I hire someone to do this for me?

No! Nobody will do your thinking or make decisions for you. This is your business. If the marketing plan is to be useful, it must reflect your ideas and efforts.

Why is planning so important?

The planning process forces you to look at your future business operations and anticipate what will happen. This process better prepares you for the future and makes you more knowledgeable about your business. Planning is vital for marketing your product in an international marketplace and at home.

Any firm considering entering into international business transactions must understand that doing business internationally is not a simple task. It is stimulating and potentially profitable in the long-term but requires much preparation and research prior to the first transaction.

In considering products or services for the international market, a business needs to be:

1. Successful in its present domestic operation.
2. Willing to commit its resources of time, people and capital to the export program. Entry into the international market may take as long as two years of cash outflow to generate profit.
3. Sensitive and aware of the cultural differences in doing business in other countries. Approach your export operations in the same way you would your domestic operations—using sound business fundamentals. Developing an international marketing plan helps you assess your present market situation, business goals and commitment, which will increase your opportunities for success.

A marketing plan is a process, not a product. It must be revised on a continual basis as your knowledge increases about international markets. You will be surprised how much easier it is to update a marketing plan after the first one is written. Planning is a continuous process. Plus, after a revision or two you will know more about your international business market opportunities to export products.
Goal Setting

Identifying business goals can be an exciting and often challenging process. It is, however, an important step in planning your entry into the international marketplace. The following exercise is an additional step to help clarify your short- and long-term goals.

Step 1: Define long-term goals.

A) What are your long term goals for this business in the next 5 years?

Examples: increase export sales by _____% annually or _____% market share or _____% profitability or return on assets.
B) How will the international trade market help you reach your long-term goals?

Step 2: Define short-term goals.

A) For your international business, what are your first year goals?

Examples: select a sales/distribution outlet in the export markets chosen; develop relationships with agents/distributors; participate in the trade shows or trade missions in chosen market(s).
B) What are your two-year goals for your international business products/services?
   Example: Modify product for metric definition; expand international opportunities from initial penetration of a market to other similar markets.

Step 3: Develop an action plan with timelines to reach your short-term goals.
Identifying Products With Export Potential

List below the products your company sells which you believe have export potential. Write down why you believe each product will be successful in the international marketplace. The reasons should be based on your current knowledge, rather than any research.

<table>
<thead>
<tr>
<th>Products/Services</th>
<th>Reasons for Export Success</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>1.</td>
</tr>
<tr>
<td>2.</td>
<td>2.</td>
</tr>
<tr>
<td>3.</td>
<td>3.</td>
</tr>
</tbody>
</table>

Based on reasons for export success, select one or more products you believe might have the best prospects for exporting.

Decision Point: These products have export potential.

Yes  No

If YES, go on to next steps.

Step 1: Select the most exportable products to be offered internationally.

To identify products with export potential, you need to consider products that are sold successfully in the domestic market. The product should fill a targeted need for the purchaser in export markets according to price, value to customer/country and market demand.

What are the major products my business sells?

1. ...........................................................................................................
2. ...........................................................................................................
3. ...........................................................................................................
What product(s) do you feel have the best potential for international trade?

1. 
2. 
3. 

Step 2: Evaluate the product(s) to be offered internationally.

What makes your product(s) attractive for an overseas market?

1. 
2. 
3. 

What do you believe international buyers will purchase your company’s products?

1. 
2. 
3. 

Determining Your Company’s Export Readiness

Pros and Cons of Market Expansion

Brainstorm a list of pros and cons for expanding your market internationally. Based on your current assumptions about your company, your company’s products and any market knowledge, determine your probability of success in the international market.

<table>
<thead>

Your Business/Company Analysis

Step 1: Why is your business successful in the domestic market? Give specific reasons. What is your company’s annual growth rate?

1. 
2. 
3. 

Step 2: What are the competitive advantages of your products or business over the domestic and international businesses?

List them:

1. 
2. 
3. 

Step 3: What is your level of commitment and that of your company’s top management to expanding into international markets? How much preparation time, planning and resources are you willing to commit to implementing and export program?

1. 
2. 
3. 
Industry Analysis

Step 1: Determine your industry’s growth for the next three years.
Talk to people in the same business or industry, research industry-specific magazines, attend trade fairs and seminars, and search the U.S. Department of Commerce’s website for industry specific reports at www.export.gov

1. 
2. 
3. 

Step 2: Research how competitive your industry is in the global markets.
Locate industry sector reports available at www.export.gov, evaluate import-export statistics from the Bureau of Census (www.census.gov), or contact your trade association, local U.S. Small Business Administration (SBA) office or the nearest U.S. Department of Commerce’s Export Assistance Center (EAC).

1. 
2. 
3. 

Step 3: Find out your industry’s future growth in the international market.
Have you contacted your nearest U.S. Export Assistance Center (EAC) for information on U.S. government programs that can help you to identify qualified, potential agents or distributors in your target markets, including the Gold Key and International Partner Search programs?

1. 
2. 
3. 
Step 4: Research federal or state government market studies that have been conducted on your industry’s potential international markets.

Obtain information available through the U.S. Department of Commerce at www.export.gov, or contact your local EAC, SBA, or SBDC office, or your trade association.

1. 

2. 

3. 

Step 5: Find export data available on your industry.

Contact your EAC, SBA, or SBDC office or research the statistics available at www.export.gov.

1. 

2. 

3. 

Developing Your Export Marketing Plan

Read Chapters 2 and 3 of this Guide before completing this section.

Step 1: Select the best countries to market your product.

Since the number of world markets to be considered by a company is very large, it is neither possible nor advisable to research them all. Thus, your firm’s time and money are spent most effectively by using a sequential screening process.

Your first step in this process is to select the more commercially attractive countries for your product. Preliminary screening involves defining the physical, political, economic and cultural environment. Research the www.export.gov website for U.S. Department of Commerce Country Commercial Guides for each country in which there is a Foreign Commercial Service presence. In addition, the Department of State has background reports on each country at www.state.gov, as does the Central Intelligence Agency’s World Factbook which can be accessed at www.cia.gov.
(1) Select 3 countries you think have the best market potential for your product;
(2) Review the market factors for each country;
(3) Research data/information for each country;
(4) Rate each factor on a scale of 1–5 with 5 being the best; and
(5) Select a target market country (C) based on your ratings (R).

</tr>
</tbody>
</table>

Indicators of population, income levels and consumption patterns should be considered. In addition, statistics on local production trends, along with imports and exports of the product category, are helpful for assessing industry market potential. Often, an industry will have a few key indicators or measures that will help determine the industry strength and demand within an international market. A manufacturer of medical equipment, for example, may use the number of hospital beds, the number of surgeries and public expenditures for health care as indicators to assess the potential for its products.

What do you believe international buyers will purchase your company’s products?

---

**Step 2: Research how competitive your industry is in the global markets.**

Much of this information can be obtained from an industry trade association for your particular industry.
What is your present U.S. market percentage?

What are the projected sales for similar products in your chosen international markets for the coming year?

What sales volume will you project for your products in these international markets for the coming year?

What is the projected growth in these international markets over the next five years?

Step 3: Identify Customers Within Your Chosen Markets.

What companies, agents or distributors have purchased similar products?

What companies, agents or distributors have made recent requests for information on similar products?
What companies, agents or distributors would most likely be prospective customers for your export products?

Step 4: Determine Method of Exporting.
How do other U.S. firms sell in the markets you have chosen?

Will you sell direct to the customer?
1. Who will represent your firm?

2. Who will service the customers’ needs?

Step 5: Building A Distributor or Agent Relationship.
Plan to travel to the country in question as many times as is necessary to build a successful relationship.

Will you appoint an agent or distributor to handle your export market? Consider legal advice from the Export Legal Assistance Network (ELAN). A free initial consultation is available by request through an SBA District Office, SBDC, SCORE or U.S. Export Assistance Center.
1. What facilities does the agent or distributor need to service the market?

____________________________________________________________________

2. What type of client should your agent or distributor be familiar with in order to sell your product?

____________________________________________________________________

3. What territory should the agent or distributor cover?

____________________________________________________________________

4. What financial strength should the agent or distributor have?

____________________________________________________________________

5. What other competitive or non-competitive lines are acceptable or not acceptable for the agent or distributor to carry?

____________________________________________________________________

6. How many sales representatives does the agent or distributor need and how often will they cover the territory?

____________________________________________________________________
Will you use an export management company (EMC) to do your marketing and distribution for you?

Yes  No

EMCs do not have to represent your company exclusively on a worldwide basis. Rather, they sometimes can represent you in specific regional markets. For example, you might contract with an EMC to sell your products in Latin American markets, while you continue to handle direct export sales to Europe and Asia.

If yes, have you development an acceptable sales and marketing plan with realistic goals you agree to?

Yes  No

Comments:

________________________________________

________________________________________

**Marketing Your Product/Service**

Given the market potential for your products in international markets, how is your product or service distinguished form others—attractive or competitive?

1. What are your product’s advantages?

   ______________________________________

   ______________________________________

2. What are your product’s disadvantages?

   ______________________________________

   ______________________________________

3. What are your competitors products’ advantages?

   ______________________________________

   ______________________________________
4. What are your competitors’ products’ disadvantages?

What needs does your product fill in a foreign market?

What competitive products are sold abroad and to whom?

How complex is your product? What skills or special training are required to:

1. Install your product?

2. Use your product?

3. Maintain your product?
4. Service your product?

What options and accessories are available?

1. Has an aftermarket been developed for your product?

2. What other equipment does the buyer need to use your product?

3. What complimentary goods does your product require?

If your product is an industrial good:

1. What firms are likely to use it?
2. What is the useful life of your product?

3. Is use or life of product affected by climate? If so, how?

4. Will geography affect product purchase; for example transportation problems?

5. Will the product be restricted abroad; for example tariffs, quotas or non-tariff barriers?

If your product is a consumer good:

1. Who will consume it? How frequently will the product be bought?

2. Is consumption affected by climate?
3. Is consumption affected by geography; for example, transportation problems?

4. Will the product be restricted abroad; for example, tariffs, quotas or non-tariff barriers?

5. Does your product conflict with traditions, habits or beliefs or customers abroad?

Support Functions

To achieve efficient sales offerings to buyers in the targeted markets, you should address several concerns regarding products, literature and customer relations.

Step 1: Identify product concerns.

Can the potential buyer see a functioning model or sample of your products that is substantially the same as would be received from production?

Yes  No

Comments:
What product labelling requirements must be met? (Metric measurements, AC or DC electrical, voltage, etc.) Keep in mind that the European Union countries now require 3 languages on all new packaging and Mexico requires labels in Spanish, while Canada requires labels in French, under the North American Free Trade Agreement.

When and how can product conversion requirements be obtained?

Can product be delivered on time as ordered? 

Yes  No

This is especially important since letters of credit are unforgiving when it comes to delivery promise dates.

Comments:

Step 2: Identify literature concerns.

If required, can you produce product literature in a language other than English? 

Yes  No

Do you need a product literature translator to handle the technical language? 

Yes  No

What special concerns should be addressed in sales literature to ensure quality and informative representation of your product? Keep in mind that translations should reflect the linguistic nuances of the country where the literature will be used.
Step 3: Identify customer relations concerns.

What is delivery time and method of shipment?

__________________________________________________________________________________

What are payment terms? Will financing be necessary to support either the pre-shipment (production) or post-shipment (accounts receivable) working capital needed for these orders? If so, are you aware of export financing programs offered by the SBA and the Export-Import Bank?

__________________________________________________________________________________

__________________________________________________________________________________

What are the warranty terms? Will inspection/acceptance be required?

__________________________________________________________________________________

__________________________________________________________________________________

Who will service the product when needed?

__________________________________________________________________________________

__________________________________________________________________________________

How will you communicate with your customer . . . through a local agent or fax? Via Internet?

__________________________________________________________________________________

__________________________________________________________________________________

Are you prepared to give the same order and delivery preferences to your international customers that you give to your domestic customers?

Yes          No
Marketing Strategy

In international sales, the chosen “terms of sale” are most important. Where should you make the product available: at your plant; at the port of exit; landed at the port of importation; or delivered free and clear to the customer’s door? The answer to this question involves determining what the market requires, and how much risk you are willing to take.

Pricing strategy depends on “terms of sale” and also considers value-added services of bringing the product to the international market.

Step 1: Define International Pricing Strategy

How do you calculate the price for each product?

What factors have you considered in setting prices?

Which products’ sales are very sensitive to price changes?

How important is pricing in your overall marketing strategy?
What are your discount policies?

What terms of sales are best for your export product?

**Step 2: Define promotional strategy.**
What advertising materials will you use?

What trade shows or trade missions will you participate in, if any?

What time of year and how often will foreign travel be made to customer markets?

**Step 3: Define customer services.**
What special customer services do you offer?
What types of payment options do you offer?

How do you handle merchandise that customers return?

Sales Forecast

Forecasting sales of your product is the starting point for your financial projections. The sales forecast is extremely useful, so it is important you use realistic estimates. Remember that sales forecasts show the expected time the sale is made. Actual cash flow will be affected by delivery date and payment terms.

Step 1: Fill in the units-sold line for markets 1, 2, and 3 for each year on the following worksheet.

Step 2: Fill in the sales price per unit for products sold in markets 1, 2 and 3.

Step 3: Calculate the total sales for each of the different markets (units sold x sales price per unit).

Step 4: Calculate the sales (all markets) for each year—add down the columns.

Step 5: Calculate the five year total sales for each market—add across the rows.

Cost of Goods Sold

The cost of goods sold internationally will differ from cost of goods sold domestically if significant product alterations will be required. These changes will affect costs in terms of material, direct and indirect labor costs.

Pass Through Costs

To ascertain the costs associated with the different terms of sale, it will be necessary to consult an international freight forwarder. For example, a typical term of sale offered by a U.S. exporter is cost, insurance and freight (CIF) port of destination. Your price can include all the costs to move the product to the port of destination and other costs necessary to complete the export transaction. However, many of these costs are incurred
by the exporter to provide a service to the importer. For example, you can price your product *Ex Works* and let your customer worry about getting the product to their destination from your factory or warehouse. However, most exporters arrange many of the details (transportation, insurance, etc.) for their customers. These costs should be identified separately on the invoice and Passed Through with little or no markup.

A typical cost work sheet will include some of the following factors. These costs are in addition to the material and labor used in the manufacture of your product.

- export packing
- container loading
- inland freight
- truck/rail unloading
- wharfage
- handling
- terminal charges
- ocean freight
- bunker surcharge
- courier mail
- tariffs

- forwarding
- export documentation
- consular legalization
- bank documentation
- dispatch
- bank collection
- cargo insurance
- other misc.
- telex
- demurrage
- import duties

To complete this worksheet, you will need to use data from the sales forecast. Certain costs related to your terms of sale may also have to be considered. For example, include cost of capital if you are extending payment terms.

**Step 1:** Fill in the units-sold line for markets 1, 2, and 3 for each year.

**Step 2:** Fill in the cost per unit for products sold in markets 1, 2 and 3.

**Step 3:** Calculate the total costs for each of the different markets (units sold x cost price per unit).

**Step 4:** Calculate the cost of goods sold—all products for each year—add down the columns.

**Step 5:** Calculate the five year cost of goods for each market—add across the rows.

International Marketing Expenses

To determine marketing costs for your export products, you should include costs that apply only to international marketing efforts. For example, cost for domestic advertising of services that do not pertain to the international market should not be included. Examples of most typical expense categories for an export business are listed below. Some of the expenses will be first-year, start-up expenses; others will occur every year.

Step 1: Review the expenses listed below. These are expenses that will be incurred because of your international business. There may be other expense categories not listed—list them under “other expenses.”
Step 2: Estimate your cost for each expense category.

Step 3: Estimate any domestic marketing expense included that is not applicable to international sales. Subtract these from the international expenses.

Step 4: Calculate the total for your international overhead expenses.

Projected Income Statement—Years 1 to 5, All Markets

You are now ready to assemble the data for your projected income statement. This statement will calculate your net profit or net loss (before income taxes) for each year.

Step 1: Fill in the sales for each year. You already have estimated these figures; just recopy them on the work sheet.

Step 2: Fill in the cost of goods sold for each year. You already have estimated these figures; just recopy them on the work sheet.

Step 3: Calculate the Gross Margin for each year (Sales minus Cost of Goods Sold).

Step 4: Calculate the Operating Expenses specifically associated with the international marketing program for each year.

Step 5: Allocate the International Division’s portion of the firm’s overall domestic operating expenses (International’s portion of lighting, office floor space, secretarial pool, etc.)

Break-Even Analysis

The break-even is the level of sales at which your total sales exactly cover your total costs, which includes non-recurrent fixed costs and variable costs. This level of sales is called the Break-Even Point (BEP) sales level.

In other words, at the BEP sales level, you will make at net profit. If you sell less than the BEP sales level, you will have a net loss.

To calculate the break-even point, costs must be identified as being either fixed or variable. Fixed expenses are those which the business will incur regardless of its sales volume—they are incurred even when a business has no sales—and include such expenses as rent, office salaries and depreciation. Variable expenses change directly and proportionately with a company’s sales and include such expenses as Cost of Goods Sold, sales commissions, etc. Some expenses are semi-variable in that they vary somewhat with sales activity but are not directly proportionate to sales. Semi-variable expenses include utilities, advertising and administrative salaries. Semi-variable expenses ideally should be broken down into their fixed and variable components for an accurate break-even analysis. Once a company’s expenses have been identified as either fixed or variable, the following formula is used to determine its break even point.

\[
\text{Break-Even Point} = \frac{\text{Total Fixed Expenses}}{1 - \frac{\text{Total Variable Expenses}}{\text{Sales Volume}}}
\]

Note: In addition to a break-even analysis, it is highly recommended that a profit and loss analysis be generated for the first few actual international transactions. Since there are a great number of variables relating to costs of goods, real transactions are required to establish actual profitability and minimize the risk of losses.
**Timetable**

This is a worksheet that you will need to work on periodically as you progress in the workbook. The purpose is to ensure that key tasks and objectives are identified and completed to ensure accomplishment of your states goals.

**Step 1: Identify key activities.**

By reviewing other portions of your marketing plan, compile a list of tasks that are vital to the successful operation of your business. Be sure to include travel to your chosen market as applicable.

**Step 2: Assign responsibility for each activity.**

For each identified activity, assign one person primary responsibility for the completion of that activity.

**Step 3: Determine scheduled start date.**

For each activity determine the date when work will begin. You should consider how the activity fits into your overall plan as well as the availability of the person responsible.

**Step 4: Determine scheduled finish date.**

For each activity determine when the activity must be completed.

Summary

Step 1: Verify completion of previous pages.
You should have finished all the other sections in the workbook before continuing any further. You are now ready to summarize the workbook into an exporting plan for your company.

Step 2: Identify your international marketing plan audience.
What type of person are you intending to satisfy with this plan? A banker? The company’s chief executive officer? The summary should briefly address all the major issues that are important to this person. You may want to have several different summaries, depending on who will read the marketing plan.

Step 3: Write a one-page summary.
You will now need to write no more than a page summarizing all the previous work sheets you have completed.
Determine which sections are going to be most interesting to your reader. Write one to three sentences that summarize each of the important sections. Keep in mind that this page will probably be the first read by this person. It is extremely important the summary be brief yet contain the information most important to the reader. This section should make the reader want to read the rest of your plan.
Summarize the sections in the order that they appear in the workbook.
International Marketing Plan Summary
Preparing An Export Price Quotation

Setting proper export prices is crucial to a successful international program; prices must be high enough to generate a reasonable profit, yet low enough to be competitive in overseas markets. Basic pricing criteria—costs, market demand, and competition—are the same for domestic and foreign sales. However, a thorough analysis of all cost factors going into producing goods for export, plus operating expenses, result in prices that are different from domestic ones (remember freight cost, insurance, etc., are pass through costs identified separately and include little or no markup).

Marginal cost pricing is an aggressive marketing strategy often used in international marketing. The theory behind marginal cost concludes that if the domestic operation is making a profit, the nonrecurrent annual fixed costs are being met. Therefore, only variable costs and profit margin should be used to establish the selling price for goods that will be sold in the international market (this strategy is used for domestic pricing as well). This results in a lower price for international goods yet maintains the profit margin. The risk of this strategy becomes apparent when the domestic operation becomes unprofitable and cannot cover the fixed costs, as each incremental sale could result in a larger loss for the company. This is a complex issue that can yield substantial benefits to company with manageable risks. Some effort should be made by management to understand this pricing strategy.

Cost Factors

In calculating an export price, be sure to take into account all the cost factors for which you, the exporter are liable.

1. Calculate direct materials and labor costs involved in producing the goods for export.
2. Calculate your factory overhead costs, prorating the amount of overhead chargeable to your proposed export order.
3. Deduct any charges not attributable to the export operation, especially if export sales represent only a small part of total sales.
4. Be sure operating expenses are covered by your gross margin. some of these expenses directly tied to your export shipments may include:

   travel expenses          catalogs, slide shows, video presentations
   promotional material     export advertising
   commissions              transportation expenses
   (usually pass through costs)
   packing materials        legal expenses*
   office supplies*         patent and trademark fees*
   communications*         taxes*
rent’
interest’
market research
translation costs
consultant fees

insurance’
provision for bad debts
credit checks
product modification
freight forwarder fees
(usually pass through costs)

5. Allow yourself a realistic price margin for unforeseen production costs, operating expenses, unavoidable risks and simple mistakes that are common in any new undertaking.

6. Also allow yourself a realistic profit or markup.

Other Factors To Consider

Market Demand—As in the domestic market, product demand is the key to setting prices in a foreign market. What will the market bear for a specific product or service? What will the estimated consumer price for your product be in each foreign market? If your prices seem out of line, try some simple product modifications to reduce the selling price, such as simplification of technology or alteration of product size to conform to local market norms. Also keep in mind that currency valuations alter the affordability of goods. A good pricing strategy should accommodate fluctuations in currency, although your company should quote prices in dollars to avoid the risks of currency devaluations.

Competition—As in the domestic market, few exporters are free to set prices without carefully evaluating their competitors’ pricing policies. The situation is further complicated by the need to evaluate the competition’s prices in each foreign market an exporter intends to enter. In a foreign market that is serviced by many competitors, an exporter may have little choice but to match the going price or even go below it to establish a market share. If, however, the exporter’s product or service is new to a particular foreign market, it may be possible to set a higher price than normally charged domesticaly.

‘These items will typically represent the expenses of the total operation, so be sure to prorate these to reflect only the operating expenses associated with your export operation.

Worksheets

Export Programs & Services

This worksheet helps you identify organizational resources that can provide programs and services to assist you in developing your international business plan and increase your export sales.

Export Costing Worksheet

Quote Preparation

Pricing is a reflection of all costs incurred and influenced by the competitiveness of the marketplace. The quotation must first determine the domestic *ex works* costs and then identify the additional costs incurred to sell overseas.

Export Costing Worksheet

**Reference Information**

1. Our Reference__________________  
2. Customer Reference__________________

**Customer Information**

3. Name__________________  
4. Address__________________

5. Cable Address__________________  
6. Telex No.__________________  
7. Fax No.__________________  
8. E-mail Address__________________

**Product Information**

9. Product__________________  
10. No. of Units__________________  
11. Net Weight__________________ (unit)  
12. Gross Weight__________________

13. Dimensions______ x _______ x _______

16. H.S. No.__________________

**Ex Works Costs**

17. Direct Materials__________________  
18. Direct Labor__________________  
19. Factory Burden__________________  
20. Cost of Goods__________________

"Ex works means that the seller fulfills his delivery obligation to the buyer when he has made the goods available at his factory, warehouse or other place of business."
21. Selling Expenses____________________(should be less than domestic sales)
22. General Expenses____________________(includes cost of money borrowed)
23. Administrative Expenses____________________
24. Export Marketing Costs (product changes, labeling)____________________
25. Profit Margin____________________
26. *Ex Works* Price____________________

Additional Exporting Costs

27. Foreign sales commission (if applicable)
28. Special export packing costs (typically 1 to 1.5 percent above *ex works* price)
29. Special labeling and marking (to protect from moisture, theft, rough handling)
30. Inland freight to pier (normal domestic common carrier; should also carry insurance)
31. Unloading charges (include demurrage, if any)
32. Terminal charges (include wharfage, if any)
33. Consular documents (includes Shippers Export Declaration [SED], export license an or certificate of origin)
34. Freight (port-to-port)—determined by freight forwarder
35. Freight forwarder fees (*must* be included)
36. Export Insurance (insurance for transit risk; also for credit risk, if credit-worthiness of buyer is unknown)
37. Cost of credit (include credit reports, letter of credit costs, amendments, if any)

38. Total additional export costs____________________

Quote = *Ex Works* Price + Total of additional exporting costs
