NCDA&CS Pesticide Disposal Program collects 3 million pounds

Program keeps products from landfill

The N.C. Department of Agriculture and Consumer Services Pesticide Disposal Assistance Program in May surpassed 3 million pounds collected since the program began in 1980. At a collection day in Nash County the program needed just 763.5 pounds to hit the 3 million pounds. Instead, residents dropped off 6,000 pounds for disposal.

“North Carolina’s was the first pesticide disposal program in the nation,” said Agriculture Commissioner Steve Troxler. “Based on weight, pesticides are more expensive and more problematic than latex paints or old gasoline for counties to dispose. “Based on weight, pesticides are more expensive and more problematic than latex paints or old gasoline for counties to dispose. The program route collection days among all 100 counties so that each county has a collection day every other year. Collections are handled through county Cooperative Extension offices. Pickups are sometimes coordinated through a county’s household hazardous waste program. In special situations, pesticide disposal assistance staff will go to a home or farm to assist with materials. (See Disposal pg. 2)

Equine owners urged to vaccinate against mosquito-borne diseases

It’s the beginning of mosquito season in North Carolina, which means it’s also time for equine owners to talk to their veterinarians about vaccinating animals against mosquito-borne diseases. West Nile Virus and Equine Encephalomyelitis are endemic across North Carolina and can cause illness or death in equine, but can be prevented with a sequence of vaccines.

“Now is the time to vaccinate against West Nile Virus and EEE,” said State Veterinarian David Marshall. “Mosquito breeding peaks in August, so starting the vaccination protocol now gives it time to take effect.”

The EEE and WNV vaccinations initially require two shots, 3 to 4 weeks apart, for horses, mules and donkeys that have no prior vaccination history. Neither vaccination fully protects the animal until several weeks after the second shot, so it is best to vaccinate as early in the mosquito season as possible. Marshall encourages horse owners to talk to their veterinarians about maintaining the vaccination year-round in North Carolina, since the mosquito season is prolonged.

“In addition to getting animals vaccinated, everyone needs to be extra vigilant now to reduce the breeding grounds for mosquitoes,” Marshall said. “Take the time now to rid your yard and pasture of any standing water to reduce the risk.”

Symptoms of EEE in equine include impaired vision, aimless wandering, head pressing, circling, inability to swallow, irregular staggering gait, paralysis, convulsions and death.

Symptoms of WNV in horses can include loss of appetite and

From the tractor
by Agriculture Commissioner Steve Troxler

Farmers have been extra busy this spring trying to get their crops in the ground. “The weather has put us a little behind” is something I’ve heard from quite a few farmers. Despite delays, soon we will see the fruits of their labor, with an abundance of local fresh fruits and vegetables in grocery stores, farmers markets and roadside stands.

The peak of the growing season is one of my favorite times of year. I love being able to harvest produce from my own fields and enjoy a tasty tomato sandwich or fresh vegetables. Driving across the state, I have seen tobacco and sweet potatoes being planted and I’ve seen plenty of pick-your-own strawberry fields and greenhouses filled with vegetables. We are truly blessed in this state with abundance and variety. Activity is starting to pick up at our state-operated farmers markets as well. We have listed some of the upcoming activities planned at the markets in the On the Horizon column on page 1. These activities are fun for the whole family, so I hope we will see you there.

Don’t Miss a Single Issue of Ag Review!
Mail the card below or save a stamp and renew online

It’s renewal time again for the Agricultural Review. Subscribers can either mail the card at left, or go online to www.AgReview.org.

If you mail the postcard, simply cut along the dotted line, attach a stamp on the back and drop it in the mail. Please do not put the postcard in an envelope, as it slows down our renewal process.

If you need to make changes, please mark those beside the address label, but do NOT cross out the barcode above your account number.

To renew online, you will need your account number (located on the postcard above your name). You can also make address changes at this site.

Commissioner Troxler

In addition to the markets we operate, you will find many community farmers markets across the state. I would encourage you to support your local farmers and these local markets. The produce will be super fresh, likely harvested that day. It doesn’t get any fresher than that unless you are growing it yourself.

If you are not sure where to find local produce or local markets, you can go to www.ncFarmFresh.com and search for local produce by commodity type, regional, farms, farmers markets and garden centers.

When you want the best, it’s Got to Be NC Agriculture!
Bucolic briefs

Two Johnston County horse show series, one an open class and the second a hunter class, have been announced. The hunter show dates are June 14, Sept. 6 and Nov. 8. Following are open horse show dates: Jackpot at the Hunt Horse Complex in Raleigh on Sept. 20 and Nov. 22. Events are held at the Johnston County Livestock Arena in Smithfield, except where noted. For more, go to www.raleighdailynews.com or call Michelle McLaughlin at 919-834-1344.

The N.C. State Beekeepers Association Spring 2014 meeting will be held July 10-12 at Wilkes County Community College in Wilkesboro. The event offers informational workshops for beginner beekeepers to advance to intermediate and includes presentations by educators and commercial operators. Vendors will also be selling woodenear, veils, gloves and other equipment. For more, contact Ed Hunt at 919-272-3692.

North Carolina peach growers approved an annual assessment to support research and marketing efforts. The assessment will be based on the total number of peach trees per commercial orchard. Growers with 100 to 500 trees will be assessed $100; for 501 to 2,500 trees, the assessment is $250. The fee is $350 for those with more than 2,500 trees. The assessment goes into effect January 2015.

The Sandhills Farmers Market in Pinehurst is accepting new applications from producer–only farmers within 75 miles of Pinehurst for the upcoming season. Interested farmers can apply online via sandhillsfarmersmarket.com or call Melanie Riley, market manager, at 803-517-5476.

Beekeepers who wish to sell surplus honey or request marketing assistance can contact NC State Beekeepers Association (919-515-1660). The N.C. Department of Agriculture and Consumer Services and the N.C. State University Apiculture Program are now accepting applications. Anyone interested in listing their information can do so by filling out an online form at ncafc.gov/SPCAP/pesticides/

ncagr.gov/SPCAP/pesticides/ to market their products to beekeepers in North Carolina. The department encourages anyone interested in participating to find more information on nettlesuncom/digitolocal.

Disposal

(Cont’d from pg. 1)

Since 1976, it has been illegal to dispose of pesticides in landfills. This program provides a way for them to be disposed of in a safe and environmentally friendly way. “This is a really great program for North Carolina,” Troxler said. “Only about half the states have a program like this one, and in those states without a program it is not really clear what they are doing with old pesticides.”

The promotion taps into a growing demand from consumers for locally sourced food, whether it’s from a home garden, farmers market, grocery store or restaurant. The National Restaurant Association reports that the top two culinary trends for 2014 are locally sourced meats and seafood and locally grown produce.

“Trends for the past few years now point to the importance of using local foods on the menus,” said Tim Parrish, NCDA&CS foodservice marketing specialist. “Our goal is to recognize that this trend can impact our local economy, promote the diversity of available North Carolina products to chefs statewide, and encourage consumers to support restaurants that feature North Carolina products on the menu.”

Dig Into Local Restaurant Week is a part of the department’s Savor NC on the Menu and Got To Be NC marketing initiatives, and is supported by foodservice distribution companies that supply restaurants across the state. Restaurateurs interested in participating can find more information at www.gottobenc.com/digitolocal.

NCD&A&S’ Dig Into Local Restaurant Week set for July

Piedmont diners interested in tasting the best of N.C. agriculture, will want to mark their calendars for July 14-23 for Dig Into Local Restaurant Week. Participating restaurant’s menus will showcase at least four North Carolina-inspired items and include a $1 donation to support the promotion. Participating restaurants may either have a “fixed-source” menu where each item is tied to a North Carolina product or ingredient. The promotion taps into a growing demand from consumers for locally sourced food, whether it’s from a home garden, farmers market, grocery store or restaurant. The National Restaurant Association reports that the top two culinary trends for 2014 are locally sourced meats and seafood and locally grown produce.

Almost a year ago, the emerald ash borer was detected in North Carolina for the first time. The invasive beetle, which bores into and kills ash trees, was found in Granville, Person, Vance and Warren counties in 2013.

From September to early November in 2013, the N.C. Forest Service released wasps to combat the pest. Releases were suspended in the winter because the wasps are not active in cold weather.

But, warmer weather is back and so are the wasp releases. Releases have begun and will likely continue weekly if environmental conditions are appropriate. To date, 31,425 female wasps have been released in North Carolina.

Recently, a Spathius agrili, a wasp species that we think will perform well in the warm temperatures of the South was released. In 2013, only a single wasp species, Tetrastichus planipennisi, was released, simply because the seasonality was biologically appropriate for it.

Both wasps, which are native to China, attack the larva of the emerald ash borer as it feeds just under the bark of an ash tree. The female wasp drills through the bark and lays an egg on the beetle larva. When the egg hatches, it feeds on the emerald ash borer larva, eventually killing it. The wasps are small and are not capable of stinging people.

A third and final wasp species, Oobius agrili, will likely be released in North Carolina later this year. This wasp attacks the egg stage of the ash borer, so it must be released when the emerald ash borer begins laying eggs (in late spring and summer). A single adult wasp can parasitize 50 or more ash borer eggs.

All four counties where the emerald ash borer has been detected are under a state and federal quarantine. The quarantines regulate the movement of ash material, the insect itself and all hardwood firewood from regulated areas to non-regulated areas.

For more information about the quarantine, visit the EAHR Journal website, or call 1-800-206-9333 (voice-mail), or send an email to newpest@ncagr.gov.

As this invasive pest continues to bore ash trees to death, hopefully the wasps will begin to reduce beetle numbers and eventually contribute to control of the emerald ash borer in the forest setting. But as with most biological control programs, this is a long-term project, so only time will tell.
Stores pay penalties for price-scanning errors

The N.C. Department of Agriculture and Consumer Services’ Standards Division recently collected fines from stores in Charlotte, Cornelius, Fayetteville, Kings Mountain, Lawndale, Lexington and Yanceyville for excessive price-scanning errors. The Standards Division conducts periodic, unannounced inspections of a business’ price-scanning system to check for any differences between the prices advertised and the prices that ring up at the register. If a store has more than a 2 percent error rate on overcharges, inspectors discuss the findings with the store manager and conduct a more intensive follow-up inspection at a later date. Undercharges are also reported, but do not count against a store.

Following are stores that paid civil penalties in the first quarter of 2014:

- CVS #6518 at 11430 N. Tryon St., Charlotte, paid $2,010 in civil penalties. An initial inspection in November 2013 revealed an error rate of 10 percent, based on 30 overcharges in a 300-item lot. The store was assessed and paid a $1,875 fine. The store passed a re-inspection in December. A third inspection in January found an error rate of 3.33 percent, based on 10 overcharges in a 300-item lot. The store was assessed and paid a $1,875 fine. The store will be re-inspected.
- CVS #3164 at 9531 South Blvd., Charlotte, paid $3,285 in civil penalties. An initial inspection in November 2013 revealed an error rate of 15 percent, based on 15 overcharges on an inspection lot of 100 randomly selected items. A second inspection in January found an error rate of 9 percent, based on 10 overcharges in a 300-item lot. The store was assessed and paid a $3,285 fine. The store was inspected again in March and had an error rate of 3 percent, based on five overcharges in a 300-item lot. The store was assessed an additional penalty of $1,130 and will be re-inspected.
- The Fresh Market #104 at 20623 Torrence Chapel, Cornelius, paid $1,800 in civil penalties. The first inspection in January found an error rate of 3.67 percent, based on three overcharges out of 100 randomly selected items. A second inspection found an error rate of 3.33 percent, based on 10 overcharges in a 300-item lot. The store was assessed an $1,800 fine, which it paid. The store will be re-inspected.
- Family Dollar #8943 at 3043 Legion Road, Fayetteville, paid $3,015 in civil penalties. An initial inspection in September 2013 found an error rate of 8 percent, based on four overcharges out of 50 randomly selected items. In October 2013, a second inspection found an error rate of 6.67 percent, based on 20 overcharges in a 300-item lot. The store was assessed and paid a $3,015 fine. A re-inspection will be required.
- Family Dollar #8091 at 160 Andrews Road, Fayetteville, paid $1,875 in civil penalties. An initial inspection in August 2013 found an error rate of 4 percent, based on four overcharges out of 100 randomly selected items. In September 2013, a second inspection found an error rate of 3.67 percent, based on 11 overcharges in a 300-item lot. The store was assessed and paid a $1,875 fine. The store passed a re-inspection in December.
- Dollar General #1971 at 709 York Road, Kings Mountain, paid a total of $3,253 in civil penalties. An initial inspection in August 2013 found an error rate of 6 percent, based on three overcharges out of 50 randomly selected items. In October 2013, a re-inspection found an error rate of 3.33 percent, based on 10 overcharges in a 300-item lot. The store was assessed a $533 fine. A third inspection in January found an error rate of 4.67 percent, based on 14 overcharges on a 300-item lot. The store paid an added fine of $1,865. The store will be re-inspected.

Additional penalties may be assessed if the store fails the follow-up inspection. In addition to the penalties paid, the store will be subject to re-inspection every 60 days from the last inspection until the error rate falls below the 2 percent-or-less rate. Additional penalties may be assessed if the store fails a re-inspection.
