"Agricultural Statistics" is an annual publication issued cooperatively by the USDA National Agricultural Statistics Service and the North Carolina Dept. of Agriculture & Consumer Services. This publication is printed on permanent, acid-free paper in compliance with the general statutes of the State of North Carolina. Publication No. 212. 4,000 copies of this public document were designed and printed at a cost of \$10,761.40, or \$2.69 per copy.

Publication No. 212

When you want **THE Best**, it's...

got to be  
**NC**  
AGRICULTURE

**W**hen you want the best, it's got to be NC! No truer statement was ever penned when you're talking about the high-quality foods, plants and fiber products that come from North Carolina farms. The Got to be NC market development program was created to increase brand awareness of farm goods grown in our state, helping consumers recognize the top-quality products grown by their neighbors.

North Carolina is the third most diverse agricultural state in the country, thanks in part to our geography, and also thanks to historical plantings of tobacco and peanuts. Many farms in the state relied on either tobacco or peanuts for the bulk of their agricultural income in the decades leading up to the 1990's. Most of these farms were small to medium-size farms, and when federal programs for these two crops were waning, diversification became the buzz word for North Carolina's agriculture.

Vertical integration of the poultry and pork industries led to rapid growth and statewide production of these commodities. Roadside stands, five state-run farmers' markets and hundreds of local farm markets created huge demand for fresh fruits, vegetables, flowers and nursery plants. Horticultural plantings were the fastest growing segment of agriculture in the state for a few years leading into the new century. Grocery chains responded to promotions by the NCDA&CS to increase their inventories of North Carolina products, with many featuring N.C. sections and identifying products as locally grown.

The Division of Marketing for the NCDA&CS embraced these changes and tweaked their marketing programs to better serve the entire agribusiness community, now worth over \$74 billion to North Carolina's economy each year. This amazing statistic affirms that agriculture and the related agribusiness industries are the number one industry in the state each year.

Marketing specialists work with commodity groups, farmers, processors, retail and foodservice vendors and others to make sure the top quality goodness grown on our farms makes it to market in a profitable fashion and filling a demand for fresh and local goods.

Consumers have seen the Big Cart---the giant grocery cart powered by a Chevy race engine---either in person or through advertising. The cart travels the state, reinforcing the Got to be NC slogan, stopping at grocery stores, participating in parades, at commodity festivals, even sporting and musical events.

The Got to be NC Festival held at the N.C. State Fairgrounds in Raleigh each May brings many of the components together in one location. Shoppers visit the N.C. Food and Wine Expo with over 100 participating companies, buy foods from concession vendors featuring N.C. products, and visit the Fiber Fest to see how wool, cotton and other fibers add value to the economy.

Ag Jam, a summer concert event, the Flavors of Carolina, the Got to be NC tents at the NC State Fair and NC Mountain State Fair all help raise awareness of the Got to be NC program. Print, electronic and web advertising further the branding campaign, and social marketing alerts computer-savvy shoppers to special events. Customers looking for local farms used [www.ncfarmfresh.com](http://www.ncfarmfresh.com) to find area farms fitting their shopping lists, and surfed [www.gottobenc.com](http://www.gottobenc.com) to find out more about agriculture in NC.

Look for the Got to be NC logo next time you're food shopping. You just might be surprised how full your cart will be with products from right here in the Old North State!

# FINE QUALITY FARM FRESH STATISTICAL REPORTS

North Carolina Field Office of USDA's National Agricultural Statistics Service compiles current and historic statistics concerning agriculture in the State. Where possible, information most often requested by farmers, the general public, and workers in government agencies are included. Reporting of crop and livestock statistics is a service provided to farmers and others in the State by the National Agricultural Statistics Service of the U.S. Department of Agriculture in cooperation with the North Carolina Department of Agriculture and Consumer Services. The collection and dissemination of agricultural statistics had its start in 1863. This is one of the oldest activities of the United States Department of Agriculture. It was recognized that there were many advantages of a joint relationship between the State and Federal Governments in the development of agricultural statistics. In 1919, the N.C. Department of Agriculture entered into a cooperative agreement with the U.S. Department of Agriculture to provide detailed agricultural statistics. The agreement resulted in the creation of the Agricultural Statistics Division of the North Carolina Department of Agriculture and Consumer Services. The North Carolina Field Office of USDA's National Agricultural Statistics Service publishes official statistics on crops, livestock, prices, and various other agricultural items. The most important reports and the approximate dates of releases are shown in the table below. The reports marked with an (\*) are issued separately and are only available at [www.ncagr.com/stats](http://www.ncagr.com/stats). All others are included in the monthly release entitled "Farm Report." These reports are free and available by writing to: Director, Agricultural Statistics, P.O. Box 27767, Raleigh, NC 27611 or E-mail at: [ncagstat@ncmail.gov](mailto:ncagstat@ncmail.gov). Current and historical data series can be found at [www.nass.usda.gov](http://www.nass.usda.gov), and using the "Quick Stats" feature.

TYPE OF REPORT	FREQUENCY OF REPORT	APPROX. DATE AVAILABLE
<b>CROP REPORTS</b>		
Prospective Plantings	Annually	End of March
Production of Field Crops, Fruits & Vegetables	Monthly (In Season)	9-12th
Grain Stocks (All Positions)	Quarterly	Jan. 10, End of Mar., June, Sept.
Annual Crop Summaries: Small Grains & Other Field Crops	Annually	September 30, January 12
<b>WEATHER-CROPS REPORTS</b>	Weekly* (monthly: Jan. & Feb.)	Monday, 4:00 pm
<b>LIVESTOCK REPORTS</b>		
Cattle & Milk Cow Inventory, Jan. 1	Annually	Beginning of February
Calf Crop	Annually	Beginning of February

<sup>1</sup> A farm is any establishment from which \$1,000 or more of agricultural products were sold or would normally be sold during the year. <sup>2</sup> The 2007 Census of Agriculture established a new farm base due to methodological changes that allowed a more accurate count of small farms. <sup>3</sup> Revised.

## NUMBER OF FARMS AND LAND IN FARMS<sup>1</sup>

<sup>1</sup> The 2007 Census of Agriculture established a new farm number base due to methodological changes that allowed a more accurate count of small farms.

## 2009 WEATHER SUMMARY

The year began with drought conditions in the Mountain Region and abnormally dry conditions in parts of the Piedmont and Coastal Plains regions. Due to timely rains in the first half of the year, the state was classified as drought free on May 12. This was the first time in more than two years that the state was drought free. Growing conditions throughout the year were very favorable and the majority of the crops progressed normally.

During the late summer and fall dry conditions returned to some parts of the state. By early-November a large area of the Piedmont and Coastal Plain regions were experiencing moderate drought. However, by November 17 the state was drought free once again due to precipitation from Tropical Storm Ida. The state finished off the year with above normal precipitation and below normal temperatures for most of December.

## DEFINITIONS & METHODOLOGY

Cash receipts for agricultural commodities are defined as the gross income from sales of crops, livestock, and livestock products during a calendar year. The USDA, Economic Research Service (ERS) uses USDA, National Agricultural Statistics Service (NASS) estimates to develop state level cash receipts. The county level cash receipts in this publication are based on the ERS state level cash receipts and various county data. To ensure respondent confidentiality, estimates at any level, including county estimates, are not published if those estimates would disclose any information about individual operations. More information about ERS and NASS data can be found at the following websites:

<http://www.ers.usda.gov/Data/FarmIncome>

\* Some counties not shown separately to avoid disclosing individual operations. <sup>1</sup> Totals may not add due to rounding. <sup>2</sup> Data provided by the NC Cooperative Extension, Income Estimates of North Carolina Timber Harvested and Delivered to Mills. Income is the delivered price paid to timber buyers upon delivery of timber to the mill.

<sup>3</sup> Data provided by the Division of Marine Fisheries, NC Department of Environmental and Natural Resources, Morehead City, NC. Income includes both commercial farm ponds and marine seafood. Income for commercial catch is valued at the point of landing.

Net farm income	3,742,988	2,984,878	2,553,232	2,794,522	2,739,163

Source: Economic Research Service, USDA. <sup>1</sup> Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. <sup>2</sup> Includes repair and maintenance of capital items, machine hire and custom work, marketing, storage, and transportation, contract labor and miscellaneous expenses.

<sup>1</sup> 2009 Preliminary. <sup>2</sup> Counties may not add to district total because undisclosed data are included in Other Counties. USDA NASS County Estimating Program Policy and Standards require districts and counties with less than 500 acres planted to a crop, or practice of a crop, be included in Other Counties. Coverage standards also apply to district and county estimates.
