

# North Carolina Weather & Crops Report

Released: November 19, 2018

## CROP SUMMARY FOR THE WEEK OF NOVEMBER 18, 2018

### DAYS SUITABLE FOR FIELD WORK

This Week	Last Week	Last Year	5-Year Avg.
2.0	3.9	5.4	5.3

### SOIL MOISTURE PERCENT

	VS	ST	A	SS
Topsoil Moisture	0	2	48	50
Subsoil Moisture	0	2	60	38

VS= Very Short ST = Short A = Adequate SS = Surplus

### CROP PROGRESS PERCENT – WITH COMPARISONS

	This Week	Last Week	Last Year	5 Yr. Avg.
<b>PLANTED:</b>				
Barley	87	77	92	86
Oats	78	76	85	77
Winter Wheat	53	44	77	69
<b>PHENOLOGICAL:</b>				
Winter Wheat Emerged	39	33	59	47
<b>HARVESTED:</b>				
Cotton	77	75	83	74
Hay: Third Cutting	90	85	95	92
Peanuts	90	85	94	91
Sorghum	86	81	100	77
Soybeans	58	52	62	59
Sweet Potatoes	92	89	96	94

### CROP CONDITION PERCENT

	VP	P	F	G	EX
Barley	1	5	12	81	1
Oats	0	2	26	71	1
Pasture	2	7	55	34	2
Winter Wheat	1	4	18	67	10

VP = Very Poor P = Poor F = Fair G = Good EX = Excellent

With these cool temps and saturated soil, it is going to a long while to dry out enough to get back in field. There have been some reports of soybeans sprouting in pods.

**Stephen Bishop – Cleveland SWCD**

Rutherford County received close to 6 inches of freezing rain and sleet this past week. Our soybean producers are looking for some dry days to harvest their beans.

**Janice Nicholson – FSA Rutherford County**

Growing season is over in Jackson and Swain counties with abundant rainfall over last 2 weeks with 3"-4", which is above normal and temperatures near normal with frost/freeze with lows in 20s/30s and highs 40s/50s.

**Robert Hawk – Swain County Extension**

Very wet conditions will be two weeks before getting back in the field.

**Gary Cross – Person County Extension**

Carteret - Rainfall of 1-3 inches prohibited most field work.  
Craven - Many areas received 1-2 inches of rainfall on farms already wet from previous rains. Thus, field work was extremely limited.

**Mike Carroll - Craven County Extension**

Cooler weather with rain, ice, and snow predominated the week. Temperatures cooled considerably for the week with highs mainly in the lower 50's and lows dipping into the lower 20's. Heavy rain early in the week was followed by some accumulating snow and ice later in the week. Soil conditions are very wet and main farm activities for the week included harvesting Christmas trees, tending livestock, and winterizing equipment.

**Stanley Holloway – Yancey County Extension**

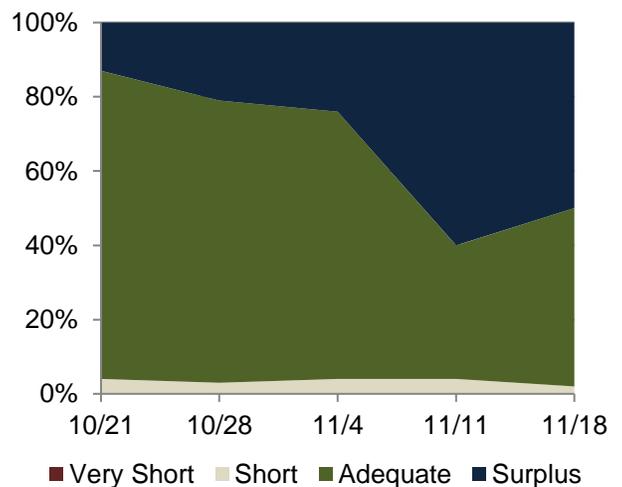

Field conditions are very wet. Pender County finally had one hard frost which will help soybeans finish drying out but rains are preventing growers from making much harvest progress. This is impacting winter wheat harvest as well.

**Mark Seitz or Tim Matthews – Pender County Extension**

### COTTON PERCENT HARVESTED

### TOPSOIL MOISTURE PERCENT

**WEATHER SUMMARY FOR THE WEEK OF NOVEMBER 18, 2018**

Location	Precipitation (Inches) <sup>1</sup>				Temperature (Degrees F.)

2018-11-12 - 2018-11-18

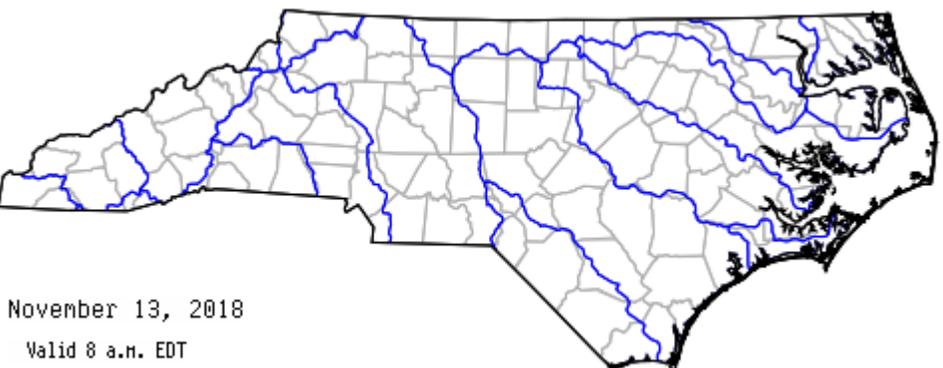

**US DROUGHT MONITOR OF NORTH CAROLINA**

<http://www.ncdrought.org/>

The US drought monitor focuses on broad scale conditions. Information provided for North Carolina is relative to information provided from all other states and the North Carolina Drought Management Advisory Council. Local conditions may vary.

**Drought Classifications**

- D0 - Abnormally Dry
- D1 - Moderate Drought
- D2 - Severe Drought
- D3 - Extreme Drought
- D4 - Exceptional Drought

□ County Boundaries    □ Major River Basins ([View Map](#))  
**S** = Short-Term, typically <6 months (e.g. agriculture, grasslands)  
**L** = Long-Term, typically >6 months (e.g. hydrology, ecology)
