Narrative Explanation, if needed

Performed a random inspection. Since the last inspection the wood paneling has been covered with FRP and damaged trim in the suites has been repaired using angled metal, and are in sound repair. Floor has been painted and gravel has been added, continue to do so and redistribute gravel as needed. One of the outside walls in the play yard has been painted and is impervious to moisture.

Dogs appeared content and there was no sign of illness in the population.

Narrative Explanation, continued

Inadequacies noted are:

0203- Impervious surfaces outdoors; Exterior wall of the building in the play yard is not sealed and impervious to moisture. Seal the wall to be impervious to moisture.

0204- Prevent cross contamination; Material and debris is being caught underneath the indoor enclosures and contamination is possible from one enclosure to the next. Address this issue so as contamination is not possible from one enclosure to the next and are easily kept sanitary.

0204- Access to wood; Dogs have contact with a wood deck in the play yard and there is a damaged wood post in one of the enclosures. Cover deck with a material impervious to moisture and replace or cover wood post with a material impervious to moisture.
