Description of Complaint

A complaint was received by e mail on 9/4/14 in reference to weak, sick kittens with eye infections, wounds and abscesses that allegedly came from Cockroach bites. Two photos were provided in the e mail which depicted 2 kittens with grossly swollen eyes. The complaint stated the shelter director was seen spraying chemical pesticide around the animals and there was no air conditioning. This same day (9/3/14) the complaint stated there were "many" weak kittens noted including one with a large abscess on it's bottom lip and another kitten that would probably be blind.
