### Narrative Explanation, continued

#### Items to be corrected:

- .0101 Veterinary Treatment / A medical log for recording any medications administered to animals housed at this shelter needs to be created.
- .0201 Facilities / Daily Waste Removal - Cat Room - evidence is seen again to indicate cat waste is not being removed from the litter pans 2 times a day. Dried cat feces is found again on the floor of the cat room.
- .0207 Sanitation / Waste Removal - Waste must be removed from the cat litter pans 2 times a day.
- .0205 Feeding / 1 food bowl per adult - Noted again today there are 2 adult dogs housed together with only 1 food bowl. Provide 1 food bowl per adult dog.
- .0206 Watering / #8 pen - the automatic waterer is broken. Fix waterer or provide an ample size water bowl for the occupants of the pen.
- .0301 #334 Dog Box - animal area needs cleaning.
- .0302 #334 Dog Box - animal area needs cleaning and sanitizing - evidence of old feces and blood. Cargo unit is to be cleaned and sanitized between shipments.
- .0302 #334 - the latches on both doors are still broken and the welded wire that was used to repair the hole has not been welded down in one area. Have the latches fixed and fix the welded wire so it is safe. If these repairs cannot be done, take this cargo unit (dog box) out of service and replace it with one that meets the Animal Welfare requirements. It was noted that a dog was waiting to come into the shelter in this dog box. The ACO was not on site. There was a large amount of diarrhea/loose feces in the dog box where the dog was housed and there was no food or water provided.
