(10)	Large muddy area in front of "B" drainage is inadequate in this area and there is at least one dog in play area that is muddy - (Contractor has been) contacted (Mann Contractors) to address drainage issues in this area	
(7)	Primary enclosures are required to be maintained in a sanitary manner at all times. Such enclosures include, but not limited to the following: Fences shall be free of sharp points or edges that could injure animals. Surfaces that are accessible to animals shall be maintained on a regular basis to remove excreta and other waste material, dirt and trash, as frequently as may be necessary to prevent the animals housed therein from soiling themselves, other animals, or humans. Surfaces that cannot be adequately cleaned and sanitized shall be replaced when worn or broken to prevent injury to animals and facilitate cleaning. Surfaces of pens, runs, and walkways shall be constructed in a manner that protects animals' feet and legs from injury. Surfaces shall be maintained in good repair to protect animals from injury. Surfaces shall be impervious to moisture. Floors shall be constructed in a manner that protects animals from injury and contains water and other liquid materials in the primary enclosure. Floors shall be maintained in good repair. Floors shall be impervious to moisture. Ceilings, walls, and any other surfaces in the animal facility shall be impervious to moisture. Ceilings, walls, and any other surfaces in the animal facility shall be constructed and maintained so as to protect animals housed in the facility from injury. Any surface that is subject to contamination shall be constructed of nonabsorbent material, or sealed so as to prevent contamination. Indoor housing facilities shall be sufficiently lighted to permit routine inspection and cleaning of the facility and observation of the animals. Sufficient illumination shall be provided to allow each animal to see all parts of its primary enclosure to assist in its well being. Natural or artificial lighting shall be uniformly diffused throughout animal facilities and provide sufficient illumination to aid in the observation of the animals and to promote the maintenance of good housekeeping practices. Lighting fixtures shall be installed so that the animals housed in the facility are protected from injury. Electric power supply sufficient for the needs of the animals housed therein and for the operation of all equipment required by these standards shall be available to all animal facilities. Adequate backup electric power shall be available to automatically start operating within 10 minutes of any primary power failure and shall be sufficient to operate all electrical equipment necessary for the health and well being of the animals housed therein for a minimum of 4 hours. Backup electric power shall be tested at least monthly under a simulated load. Records of the tests shall be maintained and made available to the Department upon request.
