**Narrative Explanation, continued**

This is a courtesy inspection today to observe the construction of this new boarding kennel.

The owner is in the process of installing the free standing indoor kennels - 2 were in place - the workmanship and installation are acceptable. Owner was advised that if there is damage above the 4 foot high FRP wall, she will have to extend the height of the FRP. She has 2 banks of stainless steel cages. Advised owner to cover the tops and backs of both banks of cages and cover the wood with a non wood product that is at the bottom of the cages. This is so dust and hair does not accumulate in hidden / hard to reach areas ( sanitation).

There will be an outdoor exercise yard on the west end of the building. The fencing will be 9 gauge chain link with vinyl fencing as a perimeter fence - all fencing will be 6 foot high.

Owner plans to be open in mid November. She will call when all the work is completed and she is ready for her licensing inspection.
