Narrative Explanation, continued

Continued from 3-25-15 Random Inspection:

*0203} Surfaces impervious to moisture - Outdoors; Not Acceptable due to the use of two play/elimination yards that have no turf, gravel or concrete present. These yards are heavily soiled with clay, and if the Kennel needs to establish them in their use, they will need to add ground covering.

*0204} Primary Enclosures in sound repair; Not Acceptable for multiple reasons

1.) The Sofa Room - Sheet Rock wall has been scratched and chewed, exposing sheetrock, repair and cover so that this area is impervious to moisture, and no animals have access to the sheetrock wall. Also, in this room I noted chipped epoxy, damaged plastic covering on the wooden door, and a chewed/damaged leather-type sofa that is exposing the inner stuffing. Do not use this room until all areas are addressed and safe for animals to be housed here.

2.) Damaged FRP Board was brought to my attention by Kennel Manager "Kat" in enclosures A6 & D2; also Suggesting to add FRP board over the old cubbies on enclosure side D, or reseal the epoxy in those cubbies.

*0204} Supervision of more than 4 in one enclosure - I viewed 5 Medium dogs at play in the front play yard without supervision- ratios were addressed and fixed before I left the premises today. Discussed with Kennel Manager Animal Welfare Requirements of supervision for more than 4 dogs within an enclosure and one person for every 10 dogs.

Facility is approved Today
