**Narrative Explanation, if needed**

From the 9-15-10 inspection, the outdoor exercise yard has had concrete installed over the entire yard which looks very good.

Items to adress now:

0201: Surgery cat room - scratched door molding and dry wall on left side need to be repaired or replaced.

0201: Exam rooms - if these rooms continue to be used to house animals in out of an enclosure,

### Narrative Explanation, continued

*Walls*

must be covered in a material that is impervious to moisture such as FRP board. If the sealed wood cabinets and doors become scratched and damaged then they will need to be replaced with a non wood material.

As long as an animal is housed in an enclosure, the walls, doors and cabinets are not an issue if the enclosure is not positioned against the wall, door or cabinet.

Comments:

Since the last inspection, shade cloth has been installed over the kennels on the west side which is the side that has the most sun exposure. The west kennels have had the chain link wire and poles painted to protect from rusting. Misters have been installed to aide in cooling during hot weather. Painting is continuing to be done on the concrete walls in the k-9 kennels.

Records were examined and found compliant.

Even though the k-9 area is indoor/outdoor, thermometers installed are recommended for those areas.

Follow-up on items 0201 will take place in 60 working days.
