Item Number	Explanation of Inadequacy (circled items above) And Recommendation For Compliance	Date Corrections Must Be Completed
15)	Sanitation - Equipment & Supplies - Incorrect mixture of cleaning agents being used. Shelter is using a mixture of Clorox and Ajax degreasing liquid to clean the kennels and accessories (food, water pans and resting boards). This combination is creating irritating fumes in the shelter. The directions on the label state not to use Ajax with chlorine bleach as it will cause fumes. Advised shelter manager to contact their vet. and get guidance on a product that will address the various viruses common in a shelter and what may be used to degrease and clean hard surfaces.	
23)	Husbandry - Animals Appearance - Today as they across the isle kennels were splashed with Ajax and Clorox solution, it was noted that many of the smaller dogs were showing signs of eye irritation such as I was from the fumes. There was water running from eyes and squinting of eyes. My own discomfort made me take time to closely observe the dogs and the procedure. Shelter manager must stop immediately using this mixture and find an animal friendly product - A product that is specific for disinfecting shelters.	
	There were no dogs or cats to be euthanized today. Records were reviewed and found compliant.	
	A dead mouse was found and bait stations were noted. An insect/vermin control company services the shelter monthly.	
	It is noted that due to injury risk for shelter personnel the quarantine dogs are not removed from their pens when they are cleaned as per AW guidelines state. This will be discussed with the health director and shelter supervisor to create a plan that will be compliant.	
	Re-Inspection in 14 calendar days.
