Watauga County Soil & Water Conservation District

971 West King Street
Boone, NC 28607
(828) 264 - 3850

To the Commission,

Watauga County Soil and Water is requesting Division Post-approval for the project 95-2022-501 at Blue Ridge Conservancy Campus. The project work was conducted without division approval due to failure to apply for division approval on the district's end before work began, however all project documentation and design requirements by the division engineers have been met and conducted under division engineer supervision. The project has been a success in reducing on-site erosion, reducing flood impacts and improving the natural resources at this location.

Sincerely,

Watauga Soil and Water Board of Supervisors
