Watauga County Soil & Water Conservation District

971 West King Street
Boone, NC 28607
(828) 264 - 3850

To the Commission,

Watauga County Soil and Water is requesting Division Post-approval for the project 95-2024-501 at Green Valley Park. The project was worked on despite approval from the division due to the selected contractor not communicating and returning plan revisions along with failure to catch this by the district technician (Brian Bonville). The division was notified of these oversights and a list of plan and work revisions was given to the Cooperator, New River Conservancy, to provide to the Division engineers. The documentation was provided and as such we request a post-approval to the work that was done. The project has greatly improved soil and water resources and flood resiliency for the river and tributary it has been installed at, all while improving recreational quality for residents who use the park.

Sincerely,

Watauga Soil and Water Board of Supervisors
