ENVIRONMENTAL HAZARDS

This pesticide is extremely toxic to fish and aquatic invertebrates. Use with care when applying in areas adjacent to any body of water. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not make applications when weather conditions favor drift from treated areas. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwaters.

This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are foraging the treatment area.

The use of bifenthrin is prohibited in areas that may result in exposure of endangered species to bifenthrin. Prior to use in a particular county, contact the local extension service for procedures and precautions to use to protect endangered species.

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- The supplemental labeling and the entire **Sniper** container label, EPA Reg.

- No. 34704-858, must be in possession of the user at the time of application.
- Read the label affixed to the container for **Sniper** before applying.
- Use of **Sniper** according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for **Sniper**.
- Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

Application Information

Refer to the **Sniper** container label for additional application instructions and restrictions.

Rate of application is variable according to pest pressure, timing of sprays, and field scouting. Use lower rates under light to moderate infestations, higher rates under heavy insect pressure and for mite control. Arid climates generally require higher rates. Cultivation within 10 feet of water body is prohibited to allow for the growth of a vegetated filter strip.
