FIFRA 24(c) Special Local Need Label (SLN)
FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF NORH CAROLINA

Acelepryn®
For Use in Forests for Nantucket Pine Tip Moth (*Rhyacionia frustranta*) Suppression

EPA Reg. No. 100-1489
EPA SLN No. NC-260002

KEEP OUT OF REACH OF CHILDREN
CAUTION

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This SLN label and main EPA-registered label must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on this SLN label and the main EPA-registered label.

Apply Acelepryn as a soil drench or soil injection application within 6 inches of the trunks of pine trees. Trees may be treated at a high rate (0.15 fl oz Acelpryn per tree) or a low rate (0.075 fl oz Acelepryn per tree). Acelepryn should be diluted to a 50:50 product:water suspension. When applied to seedlings or trees at planting, both rates can provide one year of Nantucket Pine Tip Moth suppression to small trees, and high rates can protect trees for two years.
