- Reminder -

July 1, 2014 marks the beginning of a new certification year (2014-2015) for structural pest control operators in North Carolina. Now is a good time to review your Continuing Certification Units (CCU) status in regard to where you stand in meeting your recertification requirements. You can review your current CCU credits on-line by accessing the following link to the NCSPC website: <http://www.ncagr.gov/aspzine/str-pest/Recert/RTsearch.asp>. All you have to do is type your last name in the appropriate box on the screen and then click on "Find Record", then scroll down until you find your name and click on it.

SPC Exam Results Now Available On-Line

Any individual taking an SPC exam (Certified Applicator and/or Licensed Applicator) has the choice of having their test scores mailed to them or posted on the NC SPC homepage which you can gain access to your results by clicking on "STRUCTURAL EXAM RESULTS". If you are looking for a quicker turnaround on learning your exam results then the "on-line" choice is the way to go. Renee Woody (Licensing and Outreach Manager for Structural Pest Control and Pesticide Sections) and Tammi Hester (former Information Processing Manager for Structural Pest Control and Pesticide Sections) deserve the credit for developing the program in which exam results are posted on-line.

Changes to SPC Committee – We welcome a new member to the SPC Committee;

North Carolina Senate President Tempore appointed Simon Shaw of Forsyth County. Mr. Shaw will fill the role of an active pest control representative to the Committee. He is president of Pest-X Exterminating, Inc. Mr. Shaw replaces Mr. Billy Tesh, whose term of office expires June 30, 2014. The Speaker of the House of Representatives reappointed Harold "Allen" Langley of Cleveland County to the Committee and Phil Clegg of Durham County was reappointed by the Governor's office to replace Mr. Chuck Hazelwood, whose term of office also expired on June 30, 2014. The current terms of Mr. Shaw and Mr. Langley will expire on June 30, 2018.

SPC Committee Members Whose terms expired

The Department and the Structural Pest Control Committee sincerely express their gratitude to Committee members; Billy Tesh and Chuck Hazelwood for their leadership and invaluable service as their terms on the Committee expire. Their many contributions to the Committee are greatly appreciated.

Fun Facts about bugs.....

- Ants can lift and carry more than fifty times their own weight. Ain't no way I could do that!!

- Beetles account for one quarter of all known species of plants and animals. There are more kinds of beetles than all plants. Don't forget to count the singing kind of beetles from England!!

- Blow flies are the first kind of insect attracted to an animal carcass following death. Children are the first kind of human being following behind an ice cream truck through your neighborhood!

- The term "honeymoon comes from the Middle Ages, when a newly married couple was provided with enough honey wine to last for the first month of their married life. After the first month you switch to something stronger.

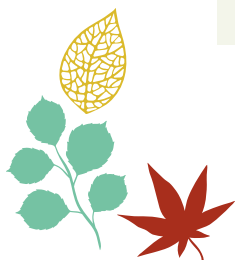

- When the droppings of a million cattle started ruining the land in Australia, dung beetles were imported to reduce the problem. I nominate Dung Beetles for the "Dirty Jobs" TV program.

- To survive the cold of winter months, many insects replace their body water with a chemical called glycerol, which acts as an "antifreeze" against the temperatures. I wonder....if a NC State trooper pulled over a flying insect whose internal "glycerol" level exceeds the legal limit, would this trooper arrest said loopy insect for DUI??? Off hand does anybody know what the legal limit IS for glycerol??

- Male mosquitoes do not bite humans, but rather live on plant juices and other natural liquids from plants and decomposing organic material. Correct me if I'm wrong but don't male homo sapiens do much the same thing when imbibing on plant juices (tequila, wine, rum) and decomposing organic matter (beer, and mighty fine Kentucky sippin whisky)??

N.C. Structural Pest Control Committee Announces Case Settlements

N.C. Structural Pest Control Committee Announces Case Settlements

On June 20, 2014 the NC Structural Pest Control Committee approved the following settlement agreements;

- Michael Fanning of Advanced Pest & Lawn in Burgaw agreed to pay \$800.00 for failing to supervise and keep accurate records of structural pest control work done by Johnsie McSwain of Carolina Bed Bug Dog in Greensboro. McSwain is a registered technician under Fanning's structural pest control license. Fanning also failed to notify the N.C. Department of Agriculture and Consumer Services'

Structural Pest Control and Pesticides Division that Advanced Pest & Lawn was also doing business as Carolina Bed Bug Dog. He also failed to request authorization to operate a branch office more than 75 miles away from its location.

- Michael A. Cole of Southern Pines agreed to pay \$ 800.00 for making false statements about high moisture levels in a crawl space at a residential property in Whispering Pines. The homeowners paid Cole's employer, Terminix Company of North Carolina, \$2530.00 for installation of a dehumidifier. A second company

and an inspector from the Structural Pest Control and Pesticides Division found that moisture-level readings were within normal range. Terminix refunded the homeowner's payment.

- Albert S. Jourdan of Southern Pines, a licensee with Terminix Company of North Carolina, agreed to pay \$600.00 for failing to supervise structural pest control work being done under his license.

RALEIGH LICENSE EXAM LOCATION

The monthly license/certification exams are administered at the Gov. James B. Martin Building which is located at the N.C. State Fairgrounds. The physical address for the fairgrounds is 1025 Blue Ridge Road, Raleigh, N.C. The most convenient entrance to find this building is located off of Trinity Road through Gate 9. From Blue Ridge Road, turn onto Trinity Road and Gate 9 will be your first entrance to the fairgrounds on your left. After Entering Gate 9, the Gov. James B. Martin Building will be the first building on your right.
