This approval does not apply to design and construction of equipment.

Approval does not imply compliance with Department of Labor Occupational Safety and Health Standards.

All Materials used must be USDA-MPITS accepted.

The rate of slaughter depends on the ability of the establishment to present clean carcasses for inspection in such a way as to allow efficient inspection as determined by inspector in charge.

It is understood that all specifications applicable to this facility are in confirmation with the suggested specification notes outlined in Agricultural Handbook No. 570.

Approved Specifications must be on file or submitted for approval.
