Agricultural Statistics

COTTON

Featuring County Estimates, 1925-1959

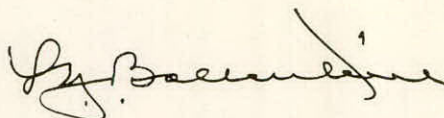

JULY - 1960

FOREWORD

This publication, which is devoted entirely to cotton, is the second in a series to be issued for each major crop produced in North Carolina. It has been prepared in response to a sharp increase in the number of requests for historical information on crop acreages and production at the county level.

County estimates on the acreage, yield, production, price and value of cotton from 1925 through 1959 are shown on pages 6 through 19. Statistics at the State level on the acreage, yield, production, price and value of cotton start with 1866 and are shown on page 3.

The publication of these data is made possible through a special project whereby State funds are matched with Federal funds received from the Agricultural Marketing Service, U.S.D.A., under provisions of the Agricultural Marketing Act of 1946.

Commissioner of Agriculture

PRODUCTION OF COTTON IN NORTH CAROLINA

Cotton has for many, many years provided North Carolina farmers with a major part of their agricultural income. As early as 1867 the acres harvested amounted to over a half million, and by 1881 the acreage had climbed to over a million. The largest crop of record for the State--1,208,000 bales--was produced in 1926 on 1,802,000 acres, also the State record for acreage harvested.

Following the record in 1926, the acreage trended downward to 1,206,000 acres in 1931. A slight increase occurred in 1932; however, the 'plow-up' program under the A.A.A. in 1933 reduced the harvest to 1,072,000 acres. Acreage restrictions came into being in 1934, and less than a million acres were harvested in 1934, 1935, and 1936. The acreage increased to 1,103,000 in 1937, and this was the last year in which the one million acre level was reached. From 1937 to date, the year-to-year fluctuation in acres harvested has been inconsistent; however, the trend during this period has been to a rather drastic reduction in acreage. Plantings during recent years have been reduced by shrinking allotments and more recently by both reduced allotments and participation in the Acreage Reserve Program. The 263,000 acres harvested in

1958 was the smallest during the entire period covered by official estimates dating back to 1866. Tar Heel growers placed 197,000 acres of cotton in the Acreage Reserve Program in that year. Due primarily to discontinuance of the Acreage Reserve Program, which had been in effect the two previous years, the 1959 harvest was increased by 127,000 acres to a total of 390,000. Even so, the acres devoted to production of cotton in 1959 was the smallest of record back to 1866, except for 1957 and 1958 when growers participated quite heavily in the Acreage Reserve Program. The sharp reduction in the acreage devoted to cotton is pointed up by the fact that only six counties harvested 427,310 acres of cotton in 1926 as compared with 390,000 acres harvested for the entire State in 1959.

It will be noted that five of the ten leading counties in 1926 were among the ten leading counties in 1959. With the exception of Robeson County, the relative rank of these counties changed from 1926 to 1959. The acreage in these counties in 1959, as compared with 1926, was less than half in three counties, less than one-third in one county, and about one-fourth in one county.

PRODUCTION OF COTTON (Cont'd.)

The ten leading counties in acres of cotton harvested in 1926 and 1959 are listed in the table below:

Rank Of Ten Leading Counties In
Acres Of Cotton Harvested,

10 LEADING COUNTIES, 1926		10 LEADING COUNTIES, 1959	
County	Acres	County	Acres
Robeson	91,480	Robeson	44,100
Johnston	85,920	Cleveland	25,100
Halifax	68,890	Sampson	23,800
Union	60,760	Johnston	21,700
Wake	60,210	Halifax	20,600
Cleveland	60,050	Northampton	19,000
Edgecombe	59,000	Scotland	14,200
Mecklenburg	58,680	Harnett	14,100
Sampson	56,610	Nash	13,200
Wayne	52,900	Hoke	13,000

According to the A.S.C. State Office, 78 of the State's 100 counties had cotton allotments in 1959. There were 82,909 farms with allotments totaling 485,983 acres. Of this number, there were 5,070 farms electing Choice 'B' allotments (140 percent of Choice 'A' allotment), with a total of 42,156 acres. See page 3 for distribution of cotton acreage in 1959.

The relative reduction in the acreage of cotton from 1926 to 1959 varied among areas within the State as well as among counties. Piedmont counties, Crop Reporting Districts 2, 5, and 8, had 41.3 percent of the State's total acreage in 1926 and 27.9 percent in 1959. Coastal counties, Crop Reporting Districts 3, 6, and 9, had 56.0 percent of the total acreage in 1926 and 70.2 percent in 1959.

While acreages have been drastically reduced, yields per acre have been greatly improved. During

the period from 1920 through 1939, the average yield per acre for the State was 280 pounds. For 1940-59, the average was 352 pounds, an increase of 26 percent, despite the fact that boll weevils reduced the average yield to only 149 pounds per acre in 1950. In other words, on the average, it took only 79.5 acres during the 20-year period 1940-59 to produce as much cotton as was grown on 100 acres during the period 1920-1939. Losses in acreages, therefore, have been offset to some extent by higher per acre yields--resulting in production losses somewhat smaller than acreage reduction. In 1958, when a record yield per acre of 466 pounds was realized, 256,000 bales were produced on 263,000 acres.

As would be expected, the proportion of total cash receipts from sales of cotton and cottonseed has declined rather sharply since 1926. Cash receipts from cotton and cottonseed accounted for 40.9 percent of the total cash receipts from farm marketings in 1924, but accounted for only 4.7 percent in 1958 and 5.4 percent in 1959 (see table below).

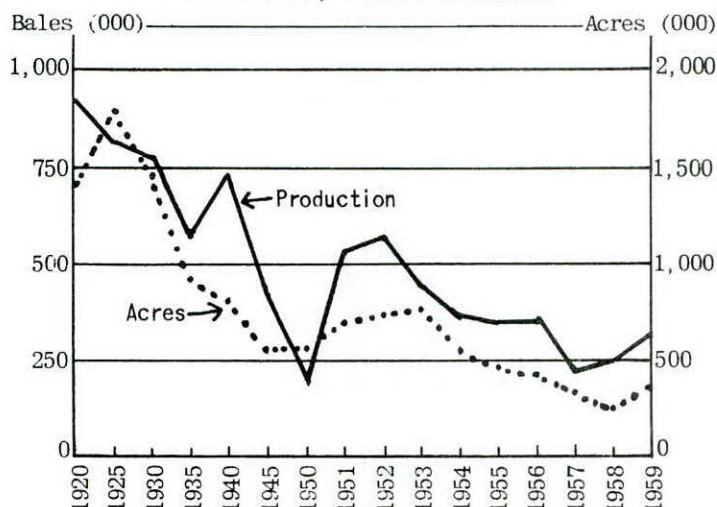

Total Cash Receipts From Farm Marketings,
Cash Receipts From Cotton And Percent
Of State Total Cash Receipts From Cotton,
1924-1959, North Carolina

Year	Total Cash Receipts From Farm Marketings of Crops, Livestock, and Products	Cash Receipts From Cotton (Lint and Seed)	Cash Receipts From Cotton as Percent of Total Cash Receipts From All Commodities
	<i>Mil. Dols.</i>	<i>Mil. Dols.</i>	<i>Percent</i>
1924	249.6	102.0	40.9
1929	241.5	73.9	30.6
1934	236.5	55.1	23.3
1939	219.4	22.7	10.4
1944	604.6	84.1	13.9
1949	738.3	91.5	12.4
1954	947.6	76.6	8.1
1955	972.0	58.5	6.0
1956	1,003.4	59.9	6.0
1957	867.3	46.1	5.3
1958	1,010.7	47.9	4.7
1959 *	964.3	52.0	5.4

* Preliminary.

From 1957 through 1959, cash receipts from farm marketings of dairy products, broilers, eggs, and hogs each exceeded those from sales of cotton and cottonseed. Prior to 1925, cash receipts from cotton and cottonseed exceeded those from tobacco. With the exception of 1927, cash receipts from marketings of tobacco in North Carolina have exceeded cotton and cottonseed each year since 1925.

1/ Used for planting crop of succeeding year. 2/ Prior to 1928 Cottonseed production was computed on the basis of 65 pounds of seed to 35 pounds of lint. 3/ Prior to 1943 seed used for planting was computed at a constant rate per acre. 4/ Total used on farms less used for planting equals fed to livestock and used for fertilizer. * From 1941 rates include snapping bolls converted to seed cotton equivalent. Data refers to wages paid from beginning of picking season to end of October. The marketing year for cottonseed is August 1 through July 31.
