Agricultural Statistics

HAY and LESPEDEZA SEED

Featuring County Estimates

USDA PHOTO

July 1964

FOREWORD

This publication, which is devoted to hay and lespedeza seed is the ninth in a series to be issued for each major crop produced in North Carolina. It has been prepared in response to a sharp increase in the number of requests for historical information on crop acreages and production at the county level.

County estimates on the acreage, yield, production, price and value of hay from 1950-1962 are shown on pages 8 through 12. Statistics at State level on the acreage, yield, production, price and value start with 1909 and are shown on page 3.

County estimates on the acreage, yield, production, price and value of lespedeza seed from 1941-1962 are shown on pages 16 through 24. Statistics at the State level on the acreage, yield, production, price and value of lespedeza seed start with 1928 and are shown on page 14.

The publication of these data is made possible through a special project whereby State funds are matched with Federal funds received from the Agricultural Marketing Service, U.S.D.A., under provisions of the Agricultural Marketing Act of 1946.

A similar publication has been issued for tobacco, cotton, peanuts, soybeans, corn, wheat, oats-barley-rye and sweetpotatoes-Irish potatoes.

NORTH CAROLINA PRODUCTION OF HAY

The first official estimate of hay production in North Carolina was made in 1909. Official estimates of the acreage harvested, yield per acre, production, price and value are shown on page 3 for 1909 through 1963.

There was a record low acreage and production of hay in 1911 when 398,000 tons were produced on 515,000 acres. Following 1911 the acreage increased gradually to 753,000 acres in 1922, to 889,000 acres in 1932, to 1,044,000 acres in 1936 and to the record high of 1,374,000 acres in 1945 (see chart page 3).

Partial or almost complete mechanization of farms made significant headway during World War II and the number of tractors on Tar Heel farms more than doubled from 1945 to 1950. The number of horses and mules declined during this same period, but at a relatively low rate. The rate of decline in the number of horses and mules; however, was sufficiently high to materially reduce the area needed to produce hay for workstock. Following 1945 the area devoted to hay declined gradually and in 1956 fell below one million acres for the first time since 1935. The acreage declined moderately in 1957 and 1958, fell off rather sharply in 1959, decreased still further in 1960 and 1961 and dropped to 693,000 acres in 1962 and 1963.

The reduction in acreage has been off-set to some extent by higher per acre yields, but to a much lesser degree than other crops such as tobacco, corn and peanuts. The record high production was set in 1949 with 1,399,000

tons produced on 1,331,000 acres. Even with higher per acre yields production has declined gradually since 1949 and during recent years it has been at about the same level as in the 1934-37 period.

Normally the Piedmont section, consisting of Districts 2, 5 and 8, produces half of the State's total tonnage of hay. The mountain section, Districts 1 and 4, accounts for about 30 percent and the remaining 20 percent is produced in the three Coastal Plain Districts (see table below).

ACREAGE OF ALL HAY HARVESTED BY CROP REPORTING DISTRICTS, 1950 AND 1962, NORTH CAROLINA

Districts*	1950		1962	
	Acres	% Of Total	Acres	% Of Total
1	111,800	9.3	98,650	14.2
4	115,000	9.6	99,650	14.4
2	202,700	16.9	136,000	19.6
5	183,800	15.3	126,000	18.2
8	134,500	11.2	86,300	12.4
3	219,200	18.2	82,450	11.9
6	97,400	8.1	23,350	3.4
9	136,600	11.4	40,600	5.9
State	1,201,000	100.0	693,000	100.0

*Mountain Districts, 1 and 4; Piedmont Districts, 2, 5 and 8. Coastal Plain Districts, 3, 6 and 9.

PRODUCTION OF HAY (Cont'd.)

Hay of one or more kinds is produced in every county in the State (see dot map, page 2). Three of the 10 counties in the State which led in the production of hay in 1950 were located in the Coastal Plain (see table below). Four of the 10 counties which led in 1950 were among the 10 leading counties in 1962; however, all of the 10 leading counties in 1962 were located in Piedmont and Mountain Districts.

Normally lespedeza hay has accounted for from one-fourth to one-third of the total hay production. More than three-fourths of the lespedeza hay is produced in the Piedmont, with Northern and Central Piedmont counties producing the major portion.

RANK OF 10 NORTH CAROLINA COUNTIES LEADING IN HAY PRODUCTION, 1950 AND 1962

1950		1962	
County	Production <i>Tons</i>	County	Production <i>Tons</i>
Iredell	37,800	Guilford	25,850
Wake	33,300	Alleghany	25,700
Guilford	32,500	Ashe	24,600
Robeson	32,400	Iredell	23,600
Rowan	31,300	Buncombe	23,550
Northampton	30,700	Randolph	21,550
Halifax	27,900	Caldwell	21,300
Ashe	26,400	Yadkin	20,150
Catawba	23,900	Wilkes	18,900
Davidson	23,700	Rowan	18,700

The production of hay by kinds is shown in the table below for 1957-61, 1962 and 1963.

KIND OF HAY	PRODUCTION		
	Average 1957-61	1962	1963
	<i>Thousand Tons</i>		
Alfalfa & Alfalfa mixtures	143	90	72
Clover & Timothy	178	182	176
Lespedeza	327	216	154
Soybean	73	91	127
Cowpea	10	9	6
Peanut	95	65	75
Grain	124	95	79
Other	61	61	63
All Hay	1,010	809	752

Clover and timothy hay has ranked second in volume of production during recent years and exceeded lespedeza hay in 1963. Clover and timothy hay is produced primarily in Mountain and Western Piedmont Counties.

Prior to 1962 alfalfa and alfalfa mixtures for hay ranked third in volume of production. During 1962 and 1963 soybean hay exceeded the production of alfalfa and alfalfa mixtures. The major portion of the soybean hay is produced in Districts 2, 5 and 9 and alfalfa is grown primarily in Districts, 2, 4 and 5.

About two-thirds of the small grain hay is produced in the Piedmont, Districts 2, 5 and 8.

PRODUCTION OF LESPEDEZA SEED IN NORTH CAROLINA

Although the variation in the production of lespedeza seed between counties is extremely wide, about nine-tenths of the counties produce some lespedeza seed (see map below). Production is concentrated in Central and Southern Piedmont counties and Beaufort county in the Coastal Plain.

The 10 counties shown in the table below led in the production of lespedeza seed in 1962 and accounted for 59.1 percent of the State's total production.

RANK OF 10 NORTH CAROLINA COUNTIES LEADING IN LESPEDEZA SEED PRODUCTION, 1962

COUNTY	PRODUCTION	COUNTY	PRODUCTION
	<i>Pounds</i>		<i>Pounds</i>
Union	1,038,000	Randolph	372,000
Beaufort	783,000	Cabarrus	266,000
Stanly	565,000	Alamance	261,000
Anson	432,000	Iredell	224,000
Lincoln	378,000	Davidson	203,000

The record high acreage and production of lespedeza seed was set in 1945 when 40,500,000 pounds were harvested from 193,000 acres. The record high yield per acre was set in 1949 with 245 pounds. The record low acreage, yield and production was set in 1928, the date the series of estimates began on lespedeza seed.

The highest per acre yields of lespedeza seed were realized during the period 1945 through 1949. Average per acre yields during ten of the eleven years since 1952 fell below 200 pounds. The average yield of 135 pounds in 1963 was the lowest since 1954.

Following 1945, the year of the record high acreage of lespedeza harvested for seed, the acreage dropped to 122,000 acres in 1950 and 1951, increased to 156,000 acres in 1953, dropped 36,000 acres in 1954, but increased 32,000 acres the following year. The acreage dropped during six of the eight years, 1956-1963, and the 46,000 acres harvested in 1963 was the lowest since 1931.
