Office Of
THE COMMISSIONER OF AGRICULTURE
Raleigh, North Carolina

Like the ocean, agriculture is always moving and changing. In North Carolina over the past years, the changes were mostly good. Elimination of the boll weevil in 1986 brought waves of cotton. Ninety five thousand acres of land rippled with white cotton balls that year. This year cotton acreage will approach four times that.

Tracking agricultural trends helps North Carolina farms thrive in a rapidly changing world. New markets are opening around the world, and keeping on top of consumer demands increases farm income. A solvent farmer keeps the country strong.

Decisions for major investments cannot be made without sound projections from the North Carolina Department of Agriculture's Statistics Division. Farmers, researchers, inspectors and even bureaucrats use these figures to plan.

Tobacco, peanut and cotton payments and assistance are figured according to projections based on this statistics book. Farmers themselves decide what to plant knowing which crops are selling well.

The most significant figure I have seen over the past ten years is the drop in the number of small farms. Our farmers are the heart and soul of this country. We could not survive without their hard work. That's why it's so important to have accurate figures. That's where this historic publication comes in. This book includes final, revised data by county for 1983-1987. It is part of a series of agricultural county estimates that dates back to 1919.

It takes teamwork to produce factual statistics. Surveys can be gritty, and time-consuming for farmers and statisticians. The results are well worthwhile as we travel on the wave of the future toward the 21st century. Agricultural statistics will prevail.

With all good wishes.

Cordially,

James A. Graham
Commissioner of Agriculture

STATISTICAL REPORTS PROGRAM

NORTH CAROLINA AGRICULTURAL STATISTICS brings together the current and historic statistics concerning agriculture in the State. Where possible, types of information most often requested by farmers, the general public, and workers in government agencies are included.

Reporting of crop and livestock statistics is a service rendered to farmers and others in the State by the National Agricultural Statistics Service of the U. S. Department of Agriculture in cooperation with the North Carolina Department of Agriculture.

The collection and dissemination of agricultural statistics had its start in 1863. This is one of the oldest activities of the United States Department of Agriculture. It was recognized that there were many advantages of a joint relationship between the State and Federal Governments in the development of agricultural statistics. Thus, in 1919 the N. C. Department of Agriculture entered into a cooperative agreement with the U. S. Department of Agriculture to provide detailed agricultural statistics. The agreement resulted in the creation of the Agricultural Statistics Division of the North Carolina Department of Agriculture.

The North Carolina Agricultural Statistics Division publishes official statistics on crops, livestock, prices, and various other agricultural items. A list of the most important reports and the approximate dates of release is shown in the table below. Those reports marked with an (*) are issued separately. All others are included in the semi-monthly release entitled "Farm Report". There is a nominal charge for these reports, which are available by writing to:
